Wasteland Oliver Franklin-Wallis, 2023-06-22 SHORTLISTED FOR THE 2024 WAINWRIGHT PRIZE FOR CONSERVATION WRITING A BBC RADIO 4 BOOK OF THE WEEK ONE OF THE NEW YORKER'S BEST BOOKS OF 2023 INCLUDED IN THE GUARDIAN'S BEST IDEAS BOOKS OF 2023 'A gripping read that will anger as much as it fascinates' Hugh Fearnley-Whittingstall 'An incredible journey into the world of rubbish, full of fascinating characters and mind-bending facts' Oliver Bullough, author of Moneyland 'Urgent, probing and endlessly interesting' Cal Flynn, author of Islands of Abandonment 'There are stories in all our discarded things: who made them, what they meant to a person before they were thrown away. In the end, it all ends up in the same place - the endless ingenuity of humanity in one filthy, fascinating mass.' When we throw things 'away', what does that actually mean? Where does it go, and who deals with it when it gets there? In *Wasteland*, award-winning journalist Oliver Franklin-Wallis takes us on an eye-opening journey through the global waste industry. From the mountainous landfills of New Delhi to Britain's overflowing sewers, from hollowed-out mining towns in the USA to Ghana's flooded second-hand markets, we meet the people on the frontline of our waste crisis - both those being exploited, and those determined to make a difference. On the way, we discover the corporate greenwashing that started the recycling movement; the dark truth behind our second-hand donations; and come face to face with the 10,000-year legacy of our nuclear waste. Both shocking and hopeful, *Wasteland* is the timely and ultimately human story at the heart of an urgent global issue.

The Great Greenwashing John Pabon, 2023-06-01 Now's not the time to pussyfoot around the issues. In this game, you've got to be brave enough to name and shame. For too long, many of the companies, governments, and individuals claiming to do the most are nowhere near walking their talk. They've put up beautiful window dressing to distract from all the horrible stuff happening inside their houses. Behind the scenes, these groups' actions hold back the very progress they claim to

support. We've been treated like fools, falling into the trap of believing their lies and refusing to question their sincerity. Greenwashing is the result.

Reassembling Rubbish Josh Lepawsky, 2018-04-13 An examination of the global trade and traffic in discarded electronics that reframes the question of the “right” thing to do with e-waste. The prevailing storyline about the problem of electronic waste frames e-waste as generated by consumers in developed countries and dumped on people and places in developing countries. In *Reassembling Rubbish*, Josh Lepawsky offers a different view. In an innovative analysis of the global trade and traffic in discarded electronics, Lepawsky reframes the question of the “right” thing to do with e-waste, mapping the complex flows of electronic materials. He counters the assumption that e-waste is a post-consumer problem, pointing out that waste occurs at all stages of electronic materials' existence, and calls attention to the under-researched world of reuse and repair. Lepawsky explains that there are conflicting legal distinctions between electronic waste and non-waste, and examines a legal case that illustrates the consequences. He shows that patterns of trade do not support the dominant narrative of e-waste dumping but rather represent the dynamic ecologies of repair, refurbishment, and materials recovery. He asks how we know waste, how we measure it, and how we construe it, and how this affects our efforts to mitigate it. We might not put so much faith in household recycling if we counted the more massive amounts of pre-consumer electronic waste as official e-waste. Lepawsky charts the “minescapes,” “productionscapes,” and “clickscapes” of electronics, and the uneven “discardscapes” they produce. Finally, he considers both conventional and unconventional e-waste solutions, including decriminalizing export for reuse, repair, and upgrade; enabling ethical trade in electronics reuse, repair, refurbishment, and recycling; implementing extended producer responsibility; and instituting robust forms of public oversight.

Architecture Beyond Criticism Wolfgang F. E. Preiser, Aaron T. Davis, Ashraf M. Salama, Andrea Hardy, 2014-11-27 For the first time, this book demonstrates that the two paradigms of architectural criticism and performance evaluation can not only co-exist but complement each other in the assessment of built works. As architecture takes more principled stances worldwide, from environmental sustainability to social, cultural, and economic activism, this book examines the roles of perceived and measured quality in architecture. By exploring in tandem both subjective traditional architectural criticism and environmental design and performance evaluation and its objective evaluation criteria, the book argues that both methodologies and outcomes can achieve a comprehensive assessment of quality in architecture. Curated by a global editorial team, the book includes: Contributions from international architects and critics based in the UK, USA, Brazil, France, Qatar, Egypt, New Zealand, China, Japan and Germany Global case studies which illustrate both perspectives addressed by the book and comparative analyses of the findings A six part organization which includes introductions and conclusions from the editors, to help guide the reader and further illuminate the contributions. By presenting a systematic approach to assessing building performance, design professionals will learn how to improve building design and performance with major stakeholders in mind, especially end users/occupants.

Waste of a Nation Assa Doron, Robin Jeffrey, 2018-03-26 In India, you can still find the kabaadiwala, the rag-and-bone man. He wanders from house to house buying old newspapers, broken utensils, plastic bottles—anything for which he can get a little cash. This custom persists and recreates itself alongside the new economies and ecologies of consumer capitalism. *Waste of a Nation* offers an anthropological and historical account of India's complex relationship with garbage. Countries around the world struggle to achieve sustainable futures. Assa Doron and Robin Jeffrey argue that in India the removal of waste and efforts to reuse it also lay waste to the lives of human beings. At the bottom of the pyramid, people who work with waste are injured and stigmatized as they deal with sewage, toxic chemicals, and rotting garbage. Terrifying events, such as atmospheric pollution and childhood stunting, that touch even the wealthy and powerful may lead to substantial changes in practices and attitudes toward sanitation. And innovative technology along with more effective local government may bring about limited improvements. But if a clean new India is to emerge as a model for other parts of the world, a "binding morality" that reaches beyond the current environmental crisis will be required. Empathy for marginalized underclasses—Dalits, poor Muslims, landless migrants—who live, almost invisibly, amid waste produced predominantly for the comfort of the better-off will be the critical element in India's relationship with waste. Solutions will arise at the

intersection of the traditional and the cutting edge, policy and practice, science and spirituality.

Deathworlds to Lifeworlds Valerie Malhotra Bentz,James Marlatt,2021-08-02 Deathworlds are places on planet earth that can no longer sustain life. These are increasing rapidly. We experience remnants of Deathworlds within our Lifeworlds (for example traumatic echoes of war, genocide, oppression). Many practices and policies, directly or indirectly, are Deathworld-Making. They undermine Lifeworlds contributing to community decline, illnesses, climate change, and species extinction. This book highlights the ways in which writing about and sharing meaningful experiences may lead to social and environmental justice practices, decreasing Deathworld-Making. Phenomenology is a method which reveals the connection between personal suffering and the suffering of the planet earth and all its creatures. Sharing can lead to collaborative relationships among strangers for social and environmental justice across barriers of culture, politics, and language. Deathworlds into Lifeworlds wakes people up to how current economic and social forces are destroying life and communities on our planet, as I have mapped in my work. The chapters by scholars around the world in this powerful book testify to the pervasive consequences of the proliferation of Deathworld-making and ways that collaboration across cultures can help move us forward. —Saskia Sassen is the Robert S. Lynd Professor of Sociology at Columbia University and a Member of its Committee on Global Thought. Recognizing the inseparability of experience, consciousness, environment and problematics in rebalancing life systems, this book offers solutions from around the world. —Four Arrows, aka Don Trent Jacobs, author of *Sitting Bull's Words for A World in Crises*, et al. This unique book brings together 78 participants from 11 countries to reveal the ways in which phenomenology - the study of consciousness and phenomena — can lead to profound personal and social transformation. Such transformation is especially powerful when Deathworlds - physical or cultural places that no longer sustain life - are transformed into lifeworlds through collaborative sharing, even when (or, perhaps, especially when) the sharing is among strangers across different cultures. The contributors share a truly wide range of human experiences, from the death of a child to ecological destruction, in offering ways to affirm life in the face of what may seem to be hopeless death-affirming challenges. —Richard P. Appelbaum, Ph.D., is Distinguished Research Professor Emeritus and former

MacArthur Foundation Chair in Global and International Studies and Sociology at the University of California, Santa Barbara. He is also a founding Professor at Fielding Graduate University, where he heads the doctoral concentration in Sustainability Leadership. *Deathworlds* is a love letter for the planet—our home. By documenting places that no longer sustain life, the authors collectively pull back the curtain on these places, rendering them meaningful by connecting what ails us with what ails the world. —Katrina S. Rogers, Ph.D., conservation activist and author *Deathworlds to Lifeworlds* represents collaboration among Fielding Graduate University, the University of Łódź (Poland), and the University of the Virgin Islands. Students and faculty from these universities participated in seminars on transformative phenomenology and developed rich phenomenologically based narratives of their experiences or others'. These phenomenological protocol narratives creatively modify and integrate with everyday experience the conceptual frameworks of Husserl, Schutz, Heidegger, Habermas, and others. The diverse protocol authors demonstrate how phenomenological reflection is transformative first by revealing how *Deathworlds*, which lead to physical, mental, social, or ecological decline, imperil invaluable *lifeworlds*. *Deathworlds* appear on *lifeworld* fringes, such as extra-urban trash landfills, where unnoticed impoverished workers labor to the destruction of their own health. Poignant protocol-narratives highlight the plight and noble struggle of homeless people, the mother of a dying 19-year-old son, persons inclined to suicide, overwhelmed first responders, alcoholics who through inspiration achieve sobriety, unravelled *We-Relationships*, those suffering from and overcoming addiction or misogynist stereotypes or excessive pressures, veterans distraught after combat, a military mother, those in liminal situations, and oppressed indigenous peoples who still make available their liberating spirituality. Transformative phenomenology exemplifies that generous responsiveness to the ethical summons to solidarity to which Levinas's Other invites us. —Michael Barber, Ph.D., Professor of Philosophy, St. Louis University. He has authored seven books and more than 80 articles in the general area of phenomenology and the social world. He is editor of *Schützian Research*, an annual interdisciplinary journal. This book helps us notice the *Deathworlds* that surround us and advocates for their de-naturalization. Its central claim is that the ten virtues of the transformative phenomenologist allow us to do so by changing ourselves and the worlds we live in. In this light, the book is an outstanding presentation of the international movement known as transformative phenomenology. It makes groundbreaking contributions to a tradition in which some of the authors are considered the main referents. Also, it offers an innovative understanding of Alfred Schutz's philosophy of the *Lifeworld* and a fruitful application of Van Manen's method of written protocols. —Carlos Belvedere, Ph.D., Professor, Faculty of Social Sciences, University of Buenos Aires *Moving beyond the social phenomenology carved out by Alfred Schütz*, this impressive volume of action-based experiential research displays the efficacy of applying phenomenological protocols to explore *Deathworlds*, the tacit side of the foundational conception of *Lifeworlds*. Over twenty-one chapters, plus an epilogue, readers are transported by the train of Transformative Phenomenology, created during what's been called the Silver Age of Phenomenology (1996 - present) at the Fielding

Graduate University. An international amalgam of students and faculty from universities in Poland, the United States, the Virgin Islands, Canada, and socio-cultural locations throughout the world harnessed their collective energy to advance the practical call of phenomenology as a pathway to meaning-making through rich descriptions of lived experience. Topics include dwelling with strangers, dealing with trash, walking with the homeless, death of a young person, overcoming colonialism, precognition, environmental destruction, and so much more. The research collection enhances what counts as phenomenological inquiry, while remaining respectful of Edmund Husserl's philosophical roots. —David Rehorick, PhD, Professor Emeritus of Sociology, University of New Brunswick (Canada) & Professor Emeritus, Fielding Graduate University (U.S.A.), Vancouver, British Columbia.

Junkyard Planet Adam Minter, 2013-11-12 How can garbage turn into gold? What does recycling have to do with globalization? Where does all that stuff we throw away go, anyway? When you drop your Diet Coke can or yesterday's newspaper in the recycling bin, where does it go? Probably halfway around the world, to people and places that clean up what you don't want and turn it into something you can't wait to buy. In *Junkyard Planet*, Adam Minter—veteran journalist and son of an American junkyard owner—travels deeply into a vast, often hidden, 500-billion-dollar industry that's transforming our economy and environment. Minter takes us from back-alley Chinese computer recycling operations to recycling factories capable of processing a jumbo jet's worth of trash every day. Along the way, we meet an international cast of characters who have figured out how to squeeze Silicon Valley-scale fortunes from what we all throw away. *Junkyard Planet* reveals how “going green” usually means making money—and why that's often the most sustainable choice, even when the recycling methods aren't pretty. With unmatched access to and insight on the waste industry, and the explanatory gifts and an eye for detail worthy of a John McPhee or William Langewiesche, Minter traces the export of America's garbage and the massive profits that China and other rising nations earn from it. What emerges is an engaging, colorful, and sometimes troubling tale of how the way we consume and discard stuff brings home the ascent of a developing world that recognizes value where Americans don't. *Junkyard Planet* reveals that Americans might need to learn a smarter way to take out the trash.

Starting from Scrap Stephen H. Greer, 2010 Stephen Greer arrived in Hong Kong in 1993, a recent college grad with no financing, scant experience, and only a notion of starting some kind of business. Fourteen years later, his company Hartwell Pacific was a \$250-million enterprise and a player in the global scrap-metal recycling trade. Along the way he encountered cultural roadblocks, ruthless and sometime unscrupulous competitors, and learned critical lessons in what makes a young business thrive. This remarkable story is chronicled here with humor, suspense, and keen insights into the strategies that made Stephen Greer a highly successful entrepreneur. --Book Jacket.

Mass Flourishing Edmund S. Phelps, 2015-03-22 In this book, Nobel Prize-winning economist Edmund Phelps draws on a lifetime of thinking to make a sweeping new argument about what makes nations prosper—and why the sources of that

prosperity are under threat today. Why did prosperity explode in some nations between the 1820s and 1960s, creating not just unprecedented material wealth but flourishing--meaningful work, self-expression, and personal growth for more people than ever before? Phelps makes the case that the wellspring of this flourishing was modern values such as the desire to create, explore, and meet challenges. These values fueled the grassroots dynamism that was necessary for widespread, indigenous innovation. Most innovation wasn't driven by a few isolated visionaries like Henry Ford and Steve Jobs; rather, it was driven by millions of people empowered to think of, develop, and market innumerable new products and processes, and improvements to existing ones. Mass flourishing--a combination of material well-being and the good life in a broader sense--was created by this mass innovation. Yet indigenous innovation and flourishing weakened decades ago. In America, evidence indicates that innovation and job satisfaction have decreased since the late 1960s, while postwar Europe has never recaptured its former dynamism. The reason, Phelps argues, is that the modern values underlying the modern economy are under threat by a resurgence of traditional, corporatist values that put the community and state over the individual. The ultimate fate of modern values is now the most pressing question for the West: will Western nations recommit themselves to modernity, grassroots dynamism, indigenous innovation, and widespread personal fulfillment, or will we go on with a narrowed innovation that limits flourishing to a few? A book of immense practical and intellectual importance, *Mass Flourishing* is essential reading for anyone who cares about the sources of prosperity and the future of the West.

Waste and Want Susan Strasser, 2024-03-26 An unprecedented look at that most commonplace act of everyday life--throwing things out--and how it has transformed American society. Susan Strasser's pathbreaking histories of housework and the rise of the mass market have become classics in the literature of consumer culture. Here she turns to an essential but neglected part of that culture--the trash it produces--and finds in it an unexpected wealth of meaning. Before the twentieth century, streets and bodies stank, but trash was nearly nonexistent. With goods and money scarce, almost everything was reused. Strasser paints a vivid picture of an America where scavenger pigs roamed the streets, swill children collected kitchen garbage, and itinerant peddlers traded manufactured goods for rags and bones. Over the last hundred years, however, Americans have become hooked on convenience, disposability, fashion, and constant technological change--the rise of mass consumption has led to waste on a previously unimaginable scale. Lively and colorful, *Waste and Want* recaptures a hidden part of our social history, vividly illustrating that what counts as trash depends on who's counting, and that what we throw away defines us as much as what we keep.

Kulturen des Reparierens Stefan Krebs, Gabriele Schabacher, Heike Weber, 2018-04-30 Reparieren und Instandhalten sind ökonomisch wie kulturell zentrale Praktiken im »Leben« technischer Dinge und Infrastrukturen. Der Band rückt diese bislang wenig untersuchten Tätigkeiten in den Vordergrund und fragt nach den Wissensformen der unterschiedlichen Kulturen des Reparierens. Die Expertisen und politischen Ambitionen menschlicher Akteure finden dabei ebenso Berücksichtigung wie die Eigendynamik der Dinge. Die Beiträge untersuchen Praktiken wie die Uhr- oder Computerreparatur sowie Räume wie die Wohnung und das Krankenhaus, das Repair Café und die Stadt des Globalen Südens. Nicht zuletzt geht es um die Frage, inwiefern Reparieren und reparaturfreundliches Design zu mehr Nachhaltigkeit beitragen können.

Hightech am Ende Stefan Laser, 2020-05-15 Stefan Laser folgt den Spuren des Werts von Elektroschrott. Mithilfe ethnographischer Studien bespricht er ein umkämpftes Gesetz in Indien, verfolgt als Mitarbeiter eines deutschen Recycling-Weltmarktführers das Schreddern und Schmelzen alter Elektronikgeräte und untersucht eine Google-Innovation zur Neugestaltung von Smartphones. Im Zentrum des Buchs steht die aufwendige, kontroverse Entstehung neuer Werte. Der Autor identifiziert das Hightech-Recycling als dominante politische und ökonomische Kraft im Umgang mit Elektroschrott - eine einseitige Strategie, die andere verdrängt und nicht zur nachhaltigen Vermeidung von Müll beiträgt.

Garbology Edward Humes, 2013-03-05 A Pulitzer Prize-winning journalist takes readers on a surprising tour of America's biggest export, our most prodigious product, and our greatest legacy: our trash The average American produces 102 tons of garbage across a lifetime and \$50 billion in squandered riches are rolled to the curb each year. But our bins are just the

starting point for a strange, impressive, mysterious, and costly journey that may also represent the greatest untapped opportunity of the century. In *Garbology*, Edward Humes investigates trash—what’s in it; how much we pay for it; how we manage to create so much of it; and how some families, communities, and even nations are finding a way back from waste to discover a new kind of prosperity. Along the way, he introduces a collection of garbage denizens unlike anyone you’ve ever met: the trash-tracking detectives of MIT, the bulldozer-driving sanitation workers building Los Angeles’ Garbage Mountain landfill, the artists residing in San Francisco’s dump, and the family whose annual trash output fills not a dumpster or a trash can, but a single mason jar. *Garbology* reveals not just what we throw away, but who we are and where our society is headed. Waste is the one environmental and economic harm that ordinary working Americans have the power to change—and prosper in the process. *Garbology* is raising awareness of trash consumption and is sparking community-wide action through One City One Book programs around the country. It is becoming an increasingly popular addition to high school and college syllabi and is being adopted by many colleges and universities for First Year Experience programs.

Garbage Land Elizabeth Royte, 2007-10-15 Out of sight, out of mind ... Into our trash cans go dead batteries, dirty diapers, bygone burritos, broken toys, tattered socks, eight-track cassettes, scratched CDs, banana peels.... But where do these things go next? In a country that consumes and then casts off more and more, what actually happens to the things we throw away? In *Garbage Land*, acclaimed science writer Elizabeth Royte leads us on the wild adventure that begins once our trash hits the bottom of the can. Along the way, we meet an odor chemist who explains why trash smells so bad; garbage fairies and recycling gurus; neighbors of massive waste dumps; CEOs making fortunes by encouraging waste or encouraging recycling—often both at the same time; scientists trying to revive our most polluted places; fertilizer fanatics and adventurers who kayak amid sewage; paper people, steel people, aluminum people, plastic people, and even a guy who swears by recycling human waste. With a wink and a nod and a tightly clasped nose, Royte takes us on a bizarre cultural tour through slime, stench, and heat—in other words, through the back end of our ever-more supersized lifestyles. By showing us what happens to the things we’ve disposed of, Royte reminds us that our decisions about consumption and waste have a very real impact—and that unless we undertake radical change, the garbage we create will always be with us: in the air we breathe, the water we drink, and the food we consume. Radiantly written and boldly reported, *Garbage Land* is a brilliant exploration into the soiled heart of the American trash can.

This Changes Everything Naomi Klein, 2015-08-04 Explains why the environmental crisis should lead to an abandonment of free market ideologies and current political systems, arguing that a massive reduction of greenhouse emissions may offer a best chance for correcting problems.
