Illuminations Alan Moore, 2023-09-14 'A wonderful collection, brilliant and often moving ... Both mind-expanding and cosmic while utterly rooted in our urban reality' NEIL GAIMAN 'One of the great fiction minds of his generation' ROLLING STONE In his first-ever short story collection, which spans forty years of work and features many never-before-published pieces, international bestselling author and legendary creator of *From Hell*, *The League of Extraordinary Gentlemen* and other modern classics, Alan Moore, presents nine stories full of wonder and strangeness, each taking us deeper into the fantastical underside of reality. In *A Hypothetical Lizard*, two concubines in a brothel for fantastical specialists fall in love, with tragic ramifications. In *Not Even Legend*, a paranormal study group is infiltrated by one of the otherworldly beings they seek to investigate. In *Illuminations*, a nostalgic older man decides to visit a seaside resort from his youth and finds the past all too close at hand. And in the monumental novella *What We Can Know About Thunderman*, which charts the surreal and Kafkaesque history of the comics industry over the last seventy-five years through several sometimes-naive and sometimes-maniacal people rising and falling on its career ladders, Moore reveals the dark, beating heart of the superhero business. From ghosts and otherworldly creatures to theoretical Boltzmann brains fashioning the universe at the big bang, *Illuminations* is exactly that - a series of bright, startling tales from a contemporary legend that reveal the full power of imagination and magic. 'One of the most significant fiction writers in English ... Moore's influence can be felt everywhere—in our literature, on our screens, in our politics' GUARDIAN *Illuminations* became a Sunday Times Top 5 Bestseller on 15th October 2022

The Many-Colored Land Julian May, 1981-04-17 In the year 2034, Theo Quderian, a French physicist, made an amusing but impractical discovery: the means to use a one-way, fixed-focus time warp that opened into a place in the Rhone River valley during the idyllic Pliocene Epoch, six million years ago. But, as time went on, a certain usefulness developed. The misfits and mavericks of the future—many of them brilliant people—began to seek this exit door to a mysterious past. In 2110, a particularly strange and interesting group was preparing to make the journey—a starship captain, a girl athlete, a paleontologist, a woman priest, and others who had reason to flee the technological perfection of twenty-second-century life. Thus begins this dazzling fantasy novel that invites comparisons with the work of J.R.R. Tolkien, Arthur C. Clarke, and Ursula Le Quin. It opens up a whole world of wonder, not in far-flung galaxies but in our own distant past on Earth—a world that will captivate not only science-fiction and fantasy fans but also those who enjoy literate thrillers. The group that passes through the time-portal finds an unforeseen strangeness on the other side. Far from being uninhabited, Pliocene Europe is the home of two warring races from another planet. There is the knightly race of the Tanu—handsome, arrogant, and possessing vast powers of psychokinesis and telepathy. And there is the outcast race of Firvulag—dwarfish, malevolent, and gifted with

their own supernormal skills. Taken captive by the Tanu and transported through the primordial European landscape, the humans manage to break free, join in an uneasy alliance with the forest-dwelling Firvulag, and, finally, launch an attack against the Tanu city of light on the banks of a river that, eons later, would be called the Rhine. Myth and legend, wit and violence, speculative science and breathtaking imagination mingle in this romantic fantasy, which is the first volume in a series about the exile world. The sequel, titled *The Golden Torc*, will follow soon.

Suldrun's Garden Jack Vance, 2011-09-29 The Lyonesse sequence evokes the Elder Isles, is a baroque land of pre-Arthurian myth now lost beneath the Atlantic, where powerful sorcerers, aloof faeries, stalwart champions, and nobles eccentric, magnanimous, and cruel pursue intrigue among their separate worlds . . . Prince Aillas of Troicinet is betrayed on his first diplomatic voyage and cast into the sea. Before he redeems his birthright, he must pass the breadth of Hybras Isle as prisoner, vagabond, and slave, an acquaintance of faeries, wizards, and errant knights, and lover to a sad and beautiful girl whose fate sets his bitter rivalry with the tyrant Casmir, King of Lyonesse. (First published in 1983)

Looking for a Ship John McPhee, 2011-04-01 This is an extraordinary tale of life on the high seas aboard one of the last American merchant ships, the S.S. *Stella Lykes*, on a forty-two-day journey from Charleston down the Pacific coast of South America. As the crew of the *Stella Lykes* makes their ocean voyage, they tell stories of other runs and other ships, tales of disaster, stupidity, greed, generosity, and courage.

Einstein's Bridge John Cramer, 2023-05-02 Somewhere in the Multiverse, in a lab distant from the Makers' Planet, Tunnel Maker, Creator of Bridges, answers an alarm. His inter-universe probe is detecting signals from another bubble universe, indicating that some new high-intelligence alien species is doing high-energy physics and creating hyperdimensional signals. Tunnel Maker knows that, in another bubble universe, the predatory Hive Mind should be receiving the same signals. It is time to make a Bridge . . . George Griffin, experimental physicist working at the newly-operational Superconducting Super Collider (SSC), observes a proton-proton collision that doesn't make sense. He chases it down and discovers a Bridgehead, a wormhole link to the Makers' universe. With help from theorist Roger Coulton and writer Alice Lancaster, he establishes communication with the Makers, only to learn that a Hive invasion of Earth is imminent. As the Hive invasion is destroying humanity, by wormhole the Makers transport George and Roger back to 1987, where they must undertake the task of manipulating the Reagan, Bush, and Clinton administrations to change the future and prevent construction of the SSC. At the publisher's request, this title is sold without DRM (Digital Rights Management).

Household Gods Harry Turtledove, Judith Tarr, 2013-10-02 Nicole Gunther-Perrin is a modern young professional, proud of her legal skills but weary of childcare, of senior law partners who put the moves on her, and of her deadbeat ex-husband. Following a ghastly day of dealing with all three, she falls into bed asleep - and awakens the next morning to find herself in a different life, that of a widowed tavernkeeper in the Roman frontier town of Carnuntum around 170 A.D. Delighted at first to

be away from corrupt, sexist modern America, she quickly begins to realise that her new world is as complicated as her old one. Violence, dirt, and pain are everywhere - and yet many of the people she comes to know are as happy as those she knew in twentieth-century Los Angeles. Slavery is a commonplace, gladiators kill for sport, and drunkenness is taken for granted - but everyday people somehow manage to face life with humour and good will. No quitter, Nicole manages to adapt to her new life despite endless worry about the fate of her children back in the twentieth century. Then plague sweeps through Carnuntum, followed by brutal war. Amid pain and loss on a level she had never imagined, Nicole finds reserves of strength she had never known.

Bioeconomy Iris Lewandowski,2017-12-11 This book is open access under a CC BY 4.0 license. This book defines the new field of Bioeconomy as the sustainable and innovative use of biomass and biological knowledge to provide food, feed, industrial products, bioenergy and ecological services. The chapters highlight the importance of bioeconomy-related concepts in public, scientific, and political discourse. Using an interdisciplinary approach, the authors outline the dimensions of the bioeconomy as a means of achieving sustainability. The authors are ideally situated to elaborate on the diverse aspects of the bioeconomy. They have acquired in-depth experience of interdisciplinary research through the university's focus on "Bioeconomy", its contribution to the Bioeconomy Research Program of the federal state of Baden-Württemberg, and its participation in the German Bioeconomy Council. With the number of bioeconomy-related projects at European universities rising, this book will provide graduate students and researchers with background information on the bioeconomy. It will familiarize scientific readers with bioeconomy-related terms and give scientific background for economists, agronomists and natural scientists alike.

The Club Leo Damrosch,2019-03-26 Prize-winning biographer Leo Damrosch tells the story of "the Club," a group of extraordinary writers, artists, and thinkers who gathered weekly at a London tavern In 1763, the painter Joshua Reynolds proposed to his friend Samuel Johnson that they invite a few friends to join them every Friday at the Turk's Head Tavern in London to dine, drink, and talk until midnight. Eventually the group came to include among its members Edmund Burke, Adam Smith, Edward Gibbon, and James Boswell. It was known simply as "the Club." In this captivating book, Leo Damrosch brings alive a brilliant, competitive, and eccentric cast of characters. With the friendship of the "odd couple" Samuel Johnson and James Boswell at the heart of his narrative, Damrosch conjures up the precarious, exciting, and often brutal world of late eighteenth-century Britain. This is the story of an extraordinary group of people whose ideas helped to shape their age, and our own.

Transforming the Workforce for Children Birth Through Age 8 National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success,2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their

early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

The Cambridge Handbook of Applied Psychological Ethics Mark M. Leach, Elizabeth Reynolds Welfel, 2018-03-15 The Cambridge Handbook of Applied Psychological Ethics is a valuable resource for psychologists and graduate students hoping to further develop their ethical decision making beyond more introductory ethics texts. The book offers real-world ethical

vignettes and considerations. Chapters cover a wide range of practice settings, populations, and topics, and are written by scholars in these settings. Chapters focus on the application of ethics to the ethical dilemmas in which mental health and other psychology professionals sometimes find themselves. Each chapter introduces a setting and gives readers a brief understanding of some of the potential ethical issues at hand, before delving deeper into the multiple ethical issues that must be addressed and the ethical principles and standards involved. No other book on the market captures the breadth of ethical issues found in daily practice and focuses entirely on applied ethics in psychology.

Barbarian Days William Finnegan,2015-08-06 Winner of the Pulitzer Prize and William Hill Sports Book of the Year: *Barbarian Days* is a deeply rendered self-portrait of a lifelong surfer looking for transcendence 'that recalls early James Salter' (Geoff Dyer, Observer) Surfing only looks like a sport. To devotees, it is something else entirely: a beautiful addiction, a mental and physical study, a passionate way of life. New Yorker writer William Finnegan first started surfing as a young boy in California and Hawaii. *Barbarian Days* is his immersive memoir of a life spent travelling the world chasing waves through the South Pacific, Australia, Asia, Africa and beyond. Finnegan describes the edgy yet enduring brotherhood forged among the swell of the surf; and recalling his own apprenticeship to the world's most famous and challenging waves, he considers the intense relationship formed between man, board and water. *Barbarian Days* is an old-school adventure story, a social history, an extraordinary exploration of one man's gradual mastering of an exacting and little-understood art. It is a memoir of dangerous obsession and enchantment. 'Reading this guy on the subject of waves and water is like reading

Hemingway on bullfighting; William Burroughs on controlled substances; Updike on adultery. . . . a coming-of-age story, seen through the gloss resin coat of a surfboard' Sports Illustrated

Newton's Wake Ken MacLeod,2007-04-01 With visionary epics like *The Stone Canal*, *The Cassini Division*, and *Cosmonaut Keep*, award-winning Scottish author Ken MacLeod has led a revolution in contemporary science fiction, blending cutting edge science and razor-sharp political insights with pure, over-the-top interstellar adventure. Now MacLeod takes this heady mix to a new level with a stunning new SF masterwork--*Newton's Wake*. In the aftermath of the *Hard Rapture*--a cataclysmic war sparked by the explosive evolution of Earth's artificial intelligences into godlike beings--a few remnants of humanity managed to survive. Some even prospered. Lucinda Carlyle, head of an ambitious clan of galactic entrepreneurs, had carved out a profitable niche for herself and her kin by taking control of the Skein, a chain of interplanetary star-gates left behind by the posthumans. But on a world called Eurydice, a remote planet at the farthest rim of the galaxy, Lucinda stumbled upon a forgotten relic of the past that could threaten her way of life. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Plum Rains Andromeda Romano-Lax,2018-06-05 In a tour-de-force tapestry of science fiction and historical fiction, Andromeda Romano-Lax presents a story set in Japan and Taiwan that spans a century of empire, conquest, progress, and destruction. 2029: In Japan, a historically mono-cultural nation, childbirth rates are at an all-time low and the elderly are living increasingly longer lives. This population crisis has precipitated the mass immigration of foreign medical workers from all over Asia, as well as the development of finely tuned artificial intelligence to step in where humans fall short. In Tokyo, Angelica Navarro, a Filipina nurse who has been in Japan for the last five years, works as caretaker for Sayoko Itou, a moody, secretive woman about to turn 100 years old. One day, Sayoko receives a present: a cutting-edge robot "friend" that will teach itself to anticipate Sayoko's every need. Angelica wonders if she is about to be forced out of her much-needed job by an inanimate object—one with a preternatural ability to uncover the most deeply buried secrets of the humans around it. Meanwhile, Sayoko becomes attached to the machine. The old woman has been hiding secrets of her own for almost a century—and she's too old to want to keep them anymore. What she reveals is a hundred-year saga of forbidden love, hidden identities, and the horrific legacy of WWII and Japanese colonialism—a confession that will tear apart her own life and Angelica's. Is the helper robot the worst thing that could have happened to the two women—or is it forcing the changes they both desperately needed?
