**Autodesk 3ds Max 2021 Managing Scenes, Files, and Projects** Serdar Hakan DÜZGÖREN, File-Handling Commands The principal commands for handling files are found on the File menu. File-Handling Apps and Utilities There are several apps and utilities available that help you manage content and files: The 3ds Max Asset Library is a standalone app that allows you to quickly access 3D content on your local computer and network in a single view, making all content instantly searchable. You can download the app from the Autodesk App store. The Bitmap / Photometric Path Editor utility lets you view bitmap paths or remove them from the scene file. The File Finder is another resource for finding 3ds Max scenes. The Resource Collector copies or moves a scene's bitmaps into a single directory. The Fix Ambient utility resolves lighting issues with older versions of scene files. The Bitmap Pager Statistics dialog provides information that helps you resolve issues with scenes that require large amounts of memory for texture maps. The Substitute modifier lets you replace linked AutoCAD Architecture objects with native 3ds Max geometry and objects. Image File Formats You can use image file formats in a variety of ways: as textures for materials, as backgrounds to viewports, as background environments, as Image Input events in Video Post, and as images projected from a light. Similarly, 3ds Max can render to a number of popular image file formats. External References (XRefs) to Objects and Scenes External references to objects and scenes are another powerful way to manage a project, especially when it involves multiple contributors.

**Poly-Modeling with 3ds Max** Todd Daniele,2012-09-10 Polymodeling is a modeling technique used in 3d modeling. Unlike box modeling, or other forms of modeling where you start out with a basic form or primitive object that determines the mass of an object, artists can use the polygon (the basic building block of all of the primitives available in 3ds Max). This approach allows for more control over the flow, placement and detail of the meshes that are built. Placement of vertices/points, edges and all other sub-elements that build our models is determined by the user, rather than pre-determined by a computer generated primitive. This book is a collection of tips, tricks and techniques on how to create professional models for advertising on T.V and the web. The author has tons of industry experience using Max toward this end, and he shares the secrets of his trade. As Production Modeler for some of today's hottest studios (including GuerillaFx, Coke Zero, MTV, Old Navy, Nike, Target, HP) Todd Daniele brings real-world experience to the book. Daniele teaches the technical aspects of polymodeling, while showing how to ultimately create content in a dynamic, efficient manner. Associated web site offers instructional files that show the models in progressive stages of development; plus a supporting internet forum: readers can log-on to this forum to ask questions or comment on anything covered in the book.
