La mediazione familiare. Dalla rottura del legame al riconoscimento dell'altro Francesco Canevelli, Marina Lucardi, 2000

No-fault Divorce Allen M. Parkman, 2019-03-04 Since 1970, all the states adopted no-fault divorce statutes, which have had the unexpected effect of producing dire financial conditions for many divorced women and their children. In this important study, economist and lawyer Allen Parkman shows how no-fault divorce has systematically operated against the interests of these women and children. With rare economic and legal insight, Parkman argues that by changing the grounds for divorce without changing the laws that define and allocate property at divorce, the legal system created substantial injustices. The key mistake, he suggests, was in accepting a definition of property that did not include the income-earning capacity--human capital--of the individuals involved. Using human capital theory, Parkman criticizes current divorce law and presents a framework for reform that would reduce the injustices introduced by no-fault divorce. He concludes that a thorough reform, however, may require the changing of the grounds for divorce to mutual consent. This book is essential reading for scholars, professionals, and, indeed, for anyone interested in the health and future of the family and the well-being of women in contemporary U.S. society.

Renegotiating Family Relationships Robert E. Emery, 2012-01-01 Long recognized as the authoritative guide for clinicians working with divorcing families, this book presents crucial concepts, strategies, and intervention techniques. Robert E. Emery describes how to help parents navigate the emotional and legal hurdles of this painful family transition while protecting their children's well-being. The book is grounded in cutting-edge research on family relationships, parenting, and children's adjustment, including Emery's groundbreaking longitudinal study of the impact of divorce mediation versus litigation. It provides a detailed treatment manual for mediating custody and other disputes, developing collaborative parenting plans, and fostering positive postdivorce family relationships. New to This Edition *Reflects the latest psychological research, as well as divorce and custody law. *Chapters on understanding and addressing divorcing partners' anger and

grief. *Treatment manual chapters have been extensively revised. *Incorporates the author's 12-year follow-up study.

Therapeutic Family Mediation Howard H. Irving, Michael Benjamin, 2002-06-12 Designed as a practical hands-on manual or text for students and professors of social work, *Therapeutic Family Mediation* will also prove highly useful to mental health practitioners, legal professionals and mediators, couples going through divorce, and community workers specializing in family services. Key Features: Guides the reader through the authors' five-step model: Intake/Assessment, Pre-Mediation, Negotiation, Termination, and Follow-Up Outlines the use of parenting plans and financial plans Explores patterns of conflict and monetary issues Explains the process of drafting contracts Provides the tools necessary for assisting high-conflict couples and culturally diverse couples

Family Development in Three Generations Hill,

The Mathematics of Marriage John M. Gottman, James D. Murray, Catherine C. Swanson, Rebecca Tyson, Kristin R. Swanson, 2005-01-14 Divorce rates are at an all-time high. But without a theoretical understanding of the processes related to marital stability and dissolution, it is difficult to design and evaluate new marriage interventions. *The Mathematics of Marriage* provides the foundation for a scientific theory of marital relations. The book does not rely on metaphors, but develops and applies a mathematical model using difference equations. The work is the fulfillment of the goal to build a mathematical framework for the general system theory of families first suggested by Ludwig Von Bertalanffy in the 1960s. The book also presents a complete introduction to the mathematics involved in theory building and testing, and details the development of experiments and models. In one marriage experiment, for example, the authors explored the effects of lowering or raising a couple's heart rates. Armed with their mathematical model, they were able to do real experiments to determine which processes were affected by their interventions. Applying ideas such as phase space, null clines, influence functions, inertia, and uninfluenced and influenced stable steady states (attractors), the authors show how other researchers can use the methods to weigh their own data with positive and negative weights. While the focus is on modeling marriage, the techniques can be applied to other types of psychological phenomena as well.

Seeing Voices Oliver Sacks, Oliver W. Sacks, 1989-01-01 A neurologist investigates the world of the deaf, examining their past and present treatment at the hands of society, and assesses the value and significance of sign language.

The Supervisory Relationship Mary Gail Frawley-O'Dea, Joan E. Sarnat, 2012-02-21 In the past two decades, many psychodynamic therapists have begun to view the relational processes taking place between patient and therapist as a central source of transformation. Yet traditional paradigms of clinical supervision, focusing primarily on didactic teaching, have limitations for training therapists to work in these new ways. This groundbreaking volume is the first to elaborate a comprehensive contemporary model of supervision. Using a wealth of examples and vignettes, the authors show how working

within the vicissitudes of the supervisory relationship can allow the supervisee to gain a deeper understanding of the treatment method being taught. Key topics discussed include issues of power and authority, regression in the supervisory relationship, rethinking the teach/treat question, parallel process as a relational phenomenon, working with group process in case conference, and the role of the organization in supporting training. This is a richly informative resource for psychologists, psychiatrists, social workers, psychoanalysts, and others involved in clinical supervision and training. It also will serve as a text for courses in supervision and organizational psychology.

Inside the Family: Toward a Theory of Family Process David Kantor, William Lehr, 1977 Describes the processes of daily living and interaction common to all families within the context of modern systems theory and reveals the means by which behavior of individual members is regulated.

Life-Enriching Education Marshall B. Rosenberg, Riane Eisler, 2003-09-01 Addressing the need for a dynamic change in the formula schools use to mold their students, this groundbreaking guide provides a new approach to education that serves the lives of everyone in the learning community. By implementing the unique communication skills outlined, educators can promote cooperation and understanding and address many of the complex problems faced in the classroom. Teachers will learn new skills to increase student interest, achievement, and retention, as well as create a safe and supportive learning and working atmosphere. They are also given strategies for cultivating emotional intelligence, respect, authenticity, and empathy and are empowered to resolve conflict and prevent or defuse violence. The end result helps teachers rediscover the joy of teaching motivated students.

Restorative Justice in Practice Joanna Shapland, Gwen Robinson, Angela Sorsby, 2011-07-15 This book analyzes the practicalities of setting up and running restorative justice schemes, the costs involved and the key professional and ethical issues involved such as victims' and offenders' needs and expectations, community and desistance.

Clinical Supervision in the Helping Professions Gerald Corey, Robert H. Haynes, Patrice Moulton, Michelle Muratori, 2014-12-01 This straightforward guide for new and practicing supervisors emphasizes the attainment of skills necessary to effectively supervise others in a variety of settings. Topics covered include the roles and responsibilities of supervisors, the supervisory relationship, models and methods of supervision, becoming a multiculturally competent supervisor, ethical and legal issues in supervision, managing crisis situations, and evaluation in supervision. User-friendly tips, case examples, sample forms, questions for reflection, and group activities are included throughout the text, as are contributing supervisors' Voices From the Field and the Authors' Personal Perspectives—making this an interactive learning tool that is sure to keep readers interested and involved. *Requests for digital versions from ACA can be found on www.wiley.com. *To purchase print copies, please visit the ACA website. *Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org

Developmental Psychopathology Charles Wenar,Patricia Kerig,2005-10-01 Accessible and clearly written, *Developmental Psychopathology* encourages students to think developmentally about psychopathology as it develops from childhood through adolescence, under the assumption that psychopathology should be regarded as normal development gone awry. The new fifth edition includes cutting-edge research, a revised organization, and new coverage of the late adolescent/early adult period

Object Relations in Psychoanalytic Theory Jay R. Greenberg,Stephen A. Mitchell,2013-12-01 *Object Relations in Psychoanalytic Theory* provides a masterful overview of the central issue concerning psychoanalysts today: finding a way to deal in theoretical terms with the importance of the patient's relationships with other people. Just as disturbed and distorted relationships lie at the core of the patient's distress, so too does the relation between analyst and patient play a key role in the analytic process. All psychoanalytic theories recognize the clinical centrality of "object relations," but much else about the concept is in dispute. In their ground-breaking exercise in comparative psychoanalysis, the authors offer a new way to understand the dramatic and confusing proliferation of approaches to object relations. The result is major clarification of the history of psychoanalysis and a reliable guide to the fundamental issues that unite and divide the field. Greenberg and Mitchell, both psychoanalysts in private practice in New York, locate much of the variation in the concept of object relations between two deeply divergent models of psychoanalysis: Freud's model, in which relations with others are determined by the individual's need to satisfy primary instinctual drives, and an alternative model, in which relationships are taken as primary. The authors then diagnose the history of disagreement about object relations as a product of competition between these disparate paradigms. Within this framework, Sullivan's interpersonal psychiatry and the British tradition of object relations theory, led by Klein, Fairbairn, Winnicott, and Guntrip, are shown to be united by their rejection of significant aspects of Freud's drive theory. In contrast, the American ego psychology of Hartmann, Jacobson, and Kernberg appears as an effort to enlarge the classical drive theory to accommodate information derived from the study of object relations. *Object Relations in Psychoanalytic Theory* offers a conceptual map of the most difficult terrain in psychoanalysis and a history of its most complex disputes. In exploring the counterpoint between different psychoanalytic schools and traditions, it provides a synthetic perspective that is a major contribution to the advance of psychoanalytic thought.

Mediation Research Kenneth Kressel,Dean G. Pruitt,1989-08-07 Discover the most up-to-date findings on a range of mediation topics Sponsored by the Center for Negotiation and Conflict Resolution In eighteen original chapters, this book, sponsored by the Center for Negotiation and Conflict Resolution, examines the nature and effectiveness of mediation in a wide variety of disputes including divorce cases, neighborhood conflicts, international disputes, environmental conflicts, and labor negotiations. The authors explain how mediation works, look at the factors that determine whether mediation can be

used to resolve a dispute, and identify the conditions under which it is most effective.

Translating Cultures David Katan, 2014-06-03 As the 21st century gets into stride so does the call for a discipline combining culture and translation. This second edition of *Translating Cultures* retains its original aim of putting some rigour and coherence into these fashionable words and lays the foundation for such a discipline. This edition has not only been thoroughly revised, but it has also been expanded. In particular, a new chapter has been added which focuses specifically on training translators for translational and intercultural competencies. The core of the book provides a model for teaching culture to translators, interpreters and other mediators. It introduces the reader to current understanding about culture and aims to raise awareness of the fundamental role of culture in constructing, perceiving and translating reality. Culture is perceived throughout as a system for orienting experience, and a basic presupposition is that the organization of experience is not 'reality', but rather a simplified model and a 'distortion' which varies from culture to culture. Each culture acts as a frame within which external signs or 'reality' are interpreted. The approach is interdisciplinary, taking ideas from contemporary translation theory, anthropology, Bateson's logical typing and metamessage theories, Bandler and Grinder's NLP meta-model theory, and Hallidayan functional grammar. Authentic texts and translations are offered to illustrate the various strategies that a cultural mediator can adopt in order to make the different cultural frames he or she is mediating between more explicit.

The Horizontal Society Lawrence Meir Friedman, 1999-01-01 This book argues that modern technology has radically and irretrievably altered our sense of identity and hence our social, political, and legal life. In traditional societies, relationships and identities were strongly vertical: there was a clear line of authority from top to bottom, and identity was fixed by one's birth or social position. But in modern society, identity and authority have become much more horizontal: people feel freer to choose who they are and to form relationships on a plane of equality. The author examines how modern life centers on human identity seen in terms of race, gender, ethnicity, and religion, and how this new way of defining oneself affects politics, social structure, and the law. He claims that our horizontal society is the product of the mass media -- in particular, television -- which break down the isolation of traditional life and allow individuals to connect with like-minded others across barriers of space and time. As horizontal groups blossom, loyalties and allegiances to smaller groups fragment what seemed to be the unity of the larger nation. In addition, the media's ability to spread a global mass culture causes a breakdown of cultural isolation that leads to more immigration and heavy pressure on the laws and institutions of citizenship and immigration.
