**Jamaica Inn** Daphne du Maurier,2023-08 From the author of Rebecca and The Birds: a classic thriller of shipwreck and murder, rich in suspense and surprise (New York Times Book Review). On a bitter November evening, young Mary Yellan journeys across the rainswept moors to Jamaica Inn in honor of her mother's dying request. When she arrives, the warning of the coachman begins to echo in her memory, for her aunt Patience cowers before hulking Uncle Joss Merlyn. Terrified of the inn's brooding power, Mary gradually finds herself ensnared in the dark schemes being enacted behind its crumbling walls -- and tempted to love a man she dares not trust. The inspiration for the 1939 Alfred Hitchcock film.

Computers Helping People with Special Needs Klaus Miesenberger,Joachim Klaus,Wolfgang Zagler,Arthur Karshmer,2008-07-14 Welcome to the proceedings of ICCHP 2008. We were proud to welcome participants from more than 40 countries from all continents to ICCHP. The International Programme Committee, encompassing 102 experts from all over the world, selected 150 full and 40 short papers out of 360 abstracts submitted to ICCHP. Our acceptance rate of about half of the submissions, demonstrates the scientific quality of the programme and in particular the proceedings you have in your hands. An impressive group of experts agreed to organize “Special Thematic Sessions” (STS) for ICCHP 2008. The existence of these STS sessions helped to bring the meeting into sharper focus in several key areas of assistive technology. In turn, this deeper level of focus helped to bring together the state-of-the-art and mainstream technical, social, cultural and political developments. Our keynote speaker, Jim Fruchterman from BeneTech, USA highlighted the importance of giving access to ICT and AT at a global level. In another keynote by Harold Thimbleby, Swansea University, UK, the role of user-centred design and usability engineering in assistive technology and accessibility was addressed. And finally, a combination keynote and panel discussion was reserved for WAI/WCAG2.0, which we expect to be the new reference point for Web accessibility from the summer of 2008 and beyond.

**The Analysis of Directional Time Series: Applications to Wind Speed and Direction** Jens Breckling,2012-12-06 Given a series of wind speeds and directions from the port of Fremantle the aim of this monograph is to detect general weather patterns and seasonal characteristics. To separate the daily land and sea breeze cycle and other short-term disturbances from the general wind, the series is divided into a daily and a longer term, synoptic component. The latter is related to the atmospheric pressure field, while the former is studied in order i) to isolate particular short-term events such as calms, storms and oscillating winds, and ii) to determine the land and sea breeze cycle which dominates the weather pattern for most of the year. All these patterns are described in detail and are related to the synoptic component of the data. Two time series models for directional data and a new measure of angular association are introduced to provide the basis for certain parts of the analysis.
