The Image of the City Kevin Lynch,1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. Reading At University Fairbairn, Gavin,Fairbairn, Susan,2001-09-01 Reading as a student demands new skills and new

disciplines. Students must read. They must read to inform themselves about the subjects they are studying and to allow them to write assignments, reports and dissertations. Though most students can read fairly well, few can make as much or as efficient use as possible of the time they devote to reading for academic purposes. Many guides to study offer a pot pourri of techniques for improving reading skills. None gives as full a treatment of this essential and underpinning area of academic life as *Reading at University*. The authors believe that students must change both the ways in which they read and the ways in which they think about reading. This book offers effective and efficient strategies for fulfilling students' reading and study potential.

Experiential Learning David A. Kolb, 2014-12-17 Experiential learning is a powerful and proven approach to teaching and learning that is based on one incontrovertible reality: people learn best through experience. Now, in this extensively updated book, David A. Kolb offers a systematic and up-to-date statement of the theory of experiential learning and its modern applications to education, work, and adult development. *Experiential Learning, Second Edition* builds on the intellectual origins of experiential learning as defined by figures such as John Dewey, Kurt Lewin, Jean Piaget, and L.S. Vygotsky, while also reflecting three full decades of research and practice since the classic first edition. Kolb models the underlying structures of the learning process based on the latest insights in psychology, philosophy, and physiology. Building on his comprehensive structural model, he offers an exceptionally useful typology of individual learning styles and corresponding structures of knowledge in different academic disciplines and careers. Kolb also applies experiential learning to higher education and lifelong learning, especially with regard to adult education. This edition reviews recent applications and uses of experiential learning, updates Kolb's framework to address the current organizational and educational landscape, and

features current examples of experiential learning both in the field and in the classroom. It will be an indispensable resource for everyone who wants to promote more effective learning: in higher education, training, organizational development, lifelong learning environments, and online.
