*Governing the Commons* Elinor Ostrom, 2015-09-23 Tackles one of the most enduring and contentious issues of positive political economy: common pool resource management.

*Gowers Review of Intellectual Property* Andrew Gowers, Great Britain: H.M. Treasury, 2006-12-06 This report examines the importance of intellectual property (IP), ranging from patents, copyright, design and trade marks, and whether in the age of globalization, digitization and increasing economic specialization it still creates incentives for innovation, without unduly limiting access to consumers and stifling further innovation. The report does recommend a radical overhaul of the system, with the review concentrating on three areas, and setting out the following recommendations: (i) strengthening enforcement of IP rights, whether through clamping down on piracy or trade in counterfeit goods; (ii) reducing costs of registering and litigating IP rights for businesses large and small; (iii) improving the balance and flexibility of IP rights to allow individuals, businesses and institutions to use content in ways consistent with the digital age.

*The Armed Forces Officer* Richard Moody Swain, Albert C. Pierce, 2017 In 1950, when he commissioned the first edition of *The Armed Forces Officer*, Secretary of Defense George C. Marshall told its author, S.L.A. Marshall, that American military officers, of whatever service, should share common ground ethically and morally. In this new edition, the authors methodically explore that common ground, reflecting on the basics of the Profession of Arms, and the officer's special place and distinctive obligations within that profession and especially to the Constitution.

**The Great Transformation** Karl Polanyi, 2000-09-10

Power Steven Lukes, 2021-04-14 The third edition of this seminal work includes the original text, first published in 1974, the updates and reflections from the second edition and two groundbreaking new chapters. *Power: A Radical View* assesses the main debates about how to conceptualize and study power, including the influential contributions of Michel Foucault. The new material includes a development of Lukes's theory of power and presents empirical cases to exemplify this. Including a refreshed introduction, this third edition brings a book that has consolidated its reputation as a classic work and a major

reference point within Social and Political Theory to a whole new audience. It can be used on modules across the Social and Political Sciences dealing with the concept of power and its manifestation in the world. It is also essential reading for all undergraduate and postgraduate students interested in the history of Social and Political Thought. New to this Edition: - A revised and refreshed introduction - Two new chapters on 'Domination and Consent' and 'Exploring the Third Dimension'

**Private Government** Elizabeth Anderson, 2019-04-30 Why our workplaces are authoritarian private governments—and why we can't see it One in four American workers says their workplace is a “dictatorship.” Yet that number almost certainly would be higher if we recognized employers for what they are—private governments with sweeping authoritarian power over our lives. Many employers minutely regulate workers' speech, clothing, and manners on the job, and employers often extend their authority to the off-duty lives of workers, who can be fired for their political speech, recreational activities, diet, and almost anything else employers care to govern. In this compelling book, Elizabeth Anderson examines why, despite all this, we continue to talk as if free markets make workers free, and she proposes a better way to think about the workplace, opening up space for discovering how workers can enjoy real freedom.

**Inventing the Future** Nick Srnicek, Alex Williams, 2015-11-17 This major new manifesto offers a “clear and compelling vision of a postcapitalist society” and shows how left-wing politics can be rebuilt for the 21st century (Mark Fisher, author of Capitalist Realism) Neoliberalism isn't working. Austerity is forcing millions into poverty and many more into precarious work, while the left remains trapped in stagnant political practices that offer no respite. Inventing the Future is a bold new manifesto for life after capitalism. Against the confused understanding of our high-tech world by both the right and the left, this book claims that the emancipatory and future-oriented possibilities of our society can be reclaimed. Instead of running from a complex future, Nick Srnicek and Alex Williams demand a postcapitalist economy capable of advancing standards, liberating humanity from work and developing technologies that expand our freedoms. This new edition includes a new chapter where they respond to their various critics.

**Processes of Prejudice** Dominic Abrams, Great Britain. Equality and Human Rights Commission, 2010

Patterns of Democracy Arend Lijphart, 2012-01-01 Examining 36 democracies from 1945 to 2010, this text arrives at conclusions about what type of democracy works best. It demonstrates that consensual systems stimulate economic growth, control inflation and unemployment, and limit budget deficits.

**Economic Security: Neglected Dimension of National Security ?** National Defense University (U S ), National Defense University (U.S.), Institute for National Strategic Studies (U S, Sheila R. Ronis, 2011-12-27 On August 24-25, 2010, the National Defense University held a conference titled “Economic Security: Neglected Dimension of National Security?” to explore the economic element of national power. This special collection of selected papers from the conference represents the view of several keynote speakers and participants in six panel discussions. It explores the complexity surrounding this

subject and examines the major elements that, interacting as a system, define the economic component of national security.

*Democratizing Candidate Selection* Guillermo Cordero, Xavier Coller, 2018-06-30 This book studies the challenges to conventional politics posed by new ways of selecting candidates for legislative elections. The recent economic crisis had profound political consequences on politics, generating an upsurge in the demand for more participative ways of decision-making in politics channelled through social movements and individuals in different countries. Some parties have reacted by introducing changes in their internal organization (via intra-party democracy), particularly related to the selection of candidates for public office. This volume explores the trends and challenges of these new methods of selection, analyses how the internet is increasingly being used as a selection tool, and evaluates some of the relevant consequences related to political representation, party cohesion and party centralization, among others.

**Democracy and Political Ignorance** Ilya Somin, 2013-10-02 One of the biggest problems with modern democracy is that most of the public is usually ignorant of politics and government. Often, many people understand that their votes are unlikely to change the outcome of an election and don't see the point in learning much about politics. This may be rational, but it creates a nation of people with little political knowledge and little ability to objectively evaluate what they do know. In *Democracy and Political Ignorance*, Ilya Somin mines the depths of ignorance in America and reveals the extent to which it is a major problem for democracy. Somin weighs various options for solving this problem, arguing that political ignorance is best mitigated and its effects lessened by decentralizing and limiting government. Somin provocatively argues that people make better decisions when they choose what to purchase in the market or which state or local government to live under, than when they vote at the ballot box, because they have stronger incentives to acquire relevant information and to use it wisely.

Toward a Theory of Spacepower: Selected Essays, 2011

*Food Security and Climate-Smart Food Systems* Mohamed Behnassi, Mirza Barjees Baig, Mohamed Taher Sraïri, Abdmalek A. Alsheikh, Ali Wafa A. Abu Risheh, 2022-02-21 The resilience of food systems and security to emerging challenges and threats, especially in the context of environmental and climate risks and global pandemics such as the Covid-19 crisis, is currently gaining growing importance in research, policy, and practice. Based on this, the core focus of this book, as a part of a series of CERES publications, consists of identifying and exploring the best ways to overcome such challenges and shocks and to build resilience in the Global South. More precisely, the book analyzes current dynamics and trends related to the climate resilience of food security and assess the relevance of emerging approaches such as climate-smart agriculture, new roles of agriculture extension, smart farming, and climate adaptation of farming systems. The book includes both conceptual and empirical research reporting lessons learned from many geographical, environmental, social, and policy settings while focusing on Africa, Middle East, and Asia. It also provides research and policy-oriented inputs and

recommendations to guide change processes at multiple scales.

*The Adult Learner* Malcolm S. Knowles, Elwood F. Holton III, Richard A. Swanson, RICHARD SWANSON, Petra A. Robinson, 2020-12-20 How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of *The Adult Learner* has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of *The Adult Learner* will provide basic instructor aids including a PowerPoint presentation for each chapter. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

**A Careful Revolution** Amelia Sharman, Maria Bargh, Kya Raina Lal, Sylvia Nissen, Sam Huggard, Matt Whineray, Richard Kaipo Lum, Judy Lawrence, Anne Gibbon, David Frame, Jonathan Boston, 2019 'I am 29 years old. I was born just before the Kyoto Protocol was signed, and since then global mean temperatures have risen by an estimated 0.2°C per decade . . . in my lifetime I am likely to experience a world that is 2°C warmer, perhaps as much as 4°C, and has more droughts, fires and floods.' Sylvia Nissen Climate crisis is upon us. By choice or necessity, New Zealand will transition to a low-emissions future. But can this revolution be careful? Can it be attentive to the disruptions it inevitably creates? Or will carefulness simply delay and dilute the changes that future people require of us? This timely collection brings together eleven authors to explore the politics and practicalities of the low-emissions transition, touching on issues of justice, tikanga, trade-offs, finance, futurism, adaptation, and more.

**Inside the Bataan Death March** Kevin C. Murphy, 2014-09-24 For two weeks during the spring of 1942, the Bataan Death March--one of the most widely condemned atrocities of World War II--unfolded. The prevailing interpretation of this event is simple: American prisoners of war suffered cruel treatment at the hands of their Japanese captors while Filipinos, sympathetic to the Americans, looked on. Most survivors of the march wrote about their experiences decades after the war and a number of factors distorted their accounts. The crucial aspect of memory is central to this study--how it is constructed, by whom and for what purpose. This book questions the prevailing interpretation, reconsiders the actions of all three groups in their cultural contexts and suggests a far greater complexity. Among the conclusions is that violence on the march was

largely the result of a clash of cultures--undisciplined, individualistic Americans encountered Japanese who valued order and form, while Filipinos were active, even ambitious, participants in the drama.

**The Production of Difference** David R. Roediger, Elizabeth D. Esch, 2012 Centering on race and empire, this book revolutionizes the history of management. From slave management to U.S. managers functioning as transnational experts on managing diversity, it shows how modern management was made at the margins. Even in scientific management, playing races against each other remained a hallmark of managerial strategy.

*Ending Discrimination Against People with Mental and Substance Use Disorders* National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Science of Changing Behavioral Health Social Norms, 2016-09-03 Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes. These disorders are among the most highly stigmatized health conditions in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years. The Community Mental Health Act of 1963 is considered a major turning point in America's efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders. *Ending Discrimination Against People with Mental and Substance Use Disorders: The Evidence for Stigma Change* explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services. It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States.

*Managing the Undesirables* Michel Agier, 2011-01-25 Official figures classify some fifty million of the world's people as 'victims of forced displacement'. Refugees, asylum seekers, disaster victims, the internally displaced and the temporarily

tolerated - categories of the excluded proliferate, but many more are left out of count. In the face of this tragedy, humanitarian action increasingly seems the only possible response. On the ground, however, the 'facilities' put in place are more reminiscent of the logic of totalitarianism. In a situation of permanent catastrophe and endless emergency, 'undesirables' are kept apart and out of sight, while the care dispensed is designed to control, filter and confine. How should we interpret the disturbing symbiosis between the hand that cares and the hand that strikes? After seven years of study in the refugee camps, Michel Agier reveals their 'disquieting ambiguity' and stresses the imperative need to take into account forms of improvisation and challenge that are currently transforming the camps, sometimes making them into towns and heralding the emergence of political subjects. A radical critique of the foundations, contexts, and political effects of humanitarian action.
