

Power Sharing And International Mediation In Ethnic Conflicts

Timothy D. Sisk

Power Sharing and International Mediation in Ethnic Conflicts Timothy D. Sisk, 1996 Can power sharing prevent violent ethnic conflict? And if so, how can the international community best promote that outcome? In this concise volume, Timothy Sisk defines power sharing as practices and institutions that result in broad-based governing coalitions generally inclusive of all major ethnic groups. He identifies the principal approaches to power sharing, including autonomy, federations, and proportional electoral systems. In addition, Sisk highlights the problems with various power-sharing approaches and practices that have been raised by scholars and practitioners alike, and the instances where power-sharing experiments have succeeded and where they have failed. Finally, he offers some guidance to policymakers as they ponder power-sharing arrangements.

Conflict and Peace Building in Divided Societies Anthony Oberschall, 2007-03-12 This groundbreaking book provides an integrated account of ethnic, nationality and sectarian conflicts in the contemporary world including the role of collective myths, the mass media and the ethnification of identities as contributors to ethnic conflicts and wars. In addition to many examples from the last two decades, Oberschall provides a comprehensive overview of the conflict and peace processes in Bosnia, Northern Ireland and the Middle East. Oberschall analyzes: peace building through constitutional design power sharing governance disarming combatants, postaccord security and refugee return transitional justice (truth and reconciliation commissions, war crimes tribunals) economic and social reconstruction in a multiethnic society. In addition to many examples from the last two decades, Oberschall provides a comprehensive overview of the conflict and peace processes

for Bosnia, Northern Ireland, and Israel-Palestinians. He argues that insurgency creates contentious issues over and above the original root causes of the conflict, that the internal divisions within the adversaries trigger conflicts that jeopardize peace processes, and that security and rebuilding a failed state are a precondition for lasting peace and a democratic polity. This book will be essential reading for undergraduate and postgraduate students, researchers and academics interested in the fields of peace studies, war and conflict studies, ethnic studies and political sociology.

Power-Sharing and Political Stability in Deeply Divided Societies Allison McCulloch, 2014-06-05 Nearly all the peace accords signed in the last two decades have included power-sharing in one form or another. The notion of both majority and minority segments co-operating for the purposes of political stability has informed both international policy prescriptions for post-conflict zones and home-grown power-sharing pacts across the globe. This book examines the effect of power-sharing forms of governance in bringing about political stability amid deep divisions. It is the first major comparison of two power-sharing designs - consociationalism and centripetalism - and it assesses a number of cases central to the debate, including Nigeria, Sri Lanka, Fiji, Bosnia and Herzegovina, Burundi and Northern Ireland. Drawing on information from a variety of sources, such as political party manifestoes and websites, media coverage, think tank reports, and election results, the author reaches significant conclusions about power-sharing as an invaluable conflict-management device. This text will be of key interest to students and scholars of ethnic conflict management, power-sharing, ethnic politics, democracy and democratization, comparative constitutional design, comparative politics, intervention and peace-building.

Asymmetric Autonomy and the Settlement of Ethnic Conflicts Marc Weller, Katherine Nobbs, 2011-10-11 Throughout the world many sovereign states grant one or more of their territories greater autonomy than other areas. This arrangement, known as asymmetric autonomy, has been adopted with greater regularity as a solution to ethnic strife and secessionist struggles in recent decades. As asymmetric autonomy becomes one of the most frequently used conflict resolution methods, examination of the positive and negative consequences of its implementation, as well as its efficacy, is vital. *Asymmetric Autonomy and the Settlement of Ethnic Conflicts* assesses the ability of such power distribution arrangements to resolve violent struggles between central governments and separatist groups. This collection of new case studies from around the world covers a host of important developments, from recentralization in Russia, to one country, two systems in China, to constitutional innovation in Iraq. As a whole, these essays examine how well asymmetric autonomy agreements can bring protracted and bloody conflicts to an end, satisfy the demands of both sides, guarantee the physical integrity of a state, and ensure peace and stability. Contributors to this book also analyze the many problems and dilemmas that can arise when autonomous regions are formed. For example, powers may be loosely defined or unrealistically assigned to the state within a state. Redrawn boundaries can create new minorities and make other groups vulnerable to human rights violations. Given

the number of limited self-determination systems in place, the essays in this volume present varied evaluations of these political structures. Asymmetric state agreements have the potential to remedy some of humanity's most intractable disputes. In *Asymmetric Autonomy and the Settlement of Ethnic Conflicts*, leading political scientists and diplomatic experts shed new light on the practical consequences of these settlements and offer sophisticated frameworks for understanding this path toward lasting peace.

Elections and Conflict Management in Africa Timothy D. Sisk, Andrew Reynolds, 1998 Elections have emerged as one of the most important, and most contentious, features of political life on the African continent. In the first half of this decade, there were more than 20 national elections, serving largely as capstones of peace processes or transitions to democracies. The outcomes of these and more recent elections have been remarkably varied, and the relationship between elections and conflict management is widely debated throughout Africa and among international observers. Elections can either help reduce tensions by reconstituting legitimate government, or they can exacerbate them by further polarizing highly conflictual societies. This timely volume examines the relationship between elections, especially electoral systems, and conflict management in Africa, while also serving as an important reference for other regions. The book brings together for the first time the latest thinking on the many different roles elections can play in democratization and conflict management.

Courts and Consociations Christopher McCrudden, Brendan O'Leary, 2013-02-21 Consociations are power-sharing arrangements, increasingly used to manage ethno-nationalist, ethno-linguistic, and ethno-religious conflicts. Current examples include Belgium, Bosnia, Northern Ireland, Burundi, and Iraq. Despite their growing popularity, they have begun to be challenged before human rights courts as being incompatible with human rights norms, particularly equality and non-discrimination. *Courts and Consociations* examines the use of power-sharing agreements, their legitimacy, and their compatibility with human rights law. Key questions include to what extent, if any, consociations conflict with the liberal individualist preferences of international human rights institutions, and to what extent consociational power-sharing may be justified to preserve peace and the integrity of political settlements. In three critical cases, the European Court of Human Rights has considered equality challenges to important consociational practices, twice in Belgium and then in *Sejdic and Finci v Bosnia* regarding the constitution established for Bosnia Herzegovina under the Dayton Agreement. The Court's decision in *Sejdic and Finci* has significantly altered the approach it previously took to judicial review of consociational arrangements in Belgium. This book accounts for this change and assess its implications. The problematic aspects of the current state of law are demonstrated. Future negotiators in places riven by potential or actual bloody ethnic conflicts may now have less flexibility in reaching a workable settlement, which may unintentionally contribute to sustaining such conflicts and make it more likely that negotiators will consider excluding regional and international courts from reviewing these political settlements. Providing a clear, accessible introduction to both the political use of power-sharing settlements and the

human rights law on the issue, this book is an invaluable guide to all academics, students, and professionals engaged with transitional justice, peace agreements, and contemporary human rights law.

Preventing Violent Conflicts Michael S. Lund, 1996 Lund, an international relations consultant, defines early warning and preventive diplomacy, looking at which methods work and why, who uses them, and recent preventive efforts, and suggests how multilateral and national entities including the US government can overcome operational challenges to effective preventive action. He outlines a more systematic, global preventive regime that draws on the strengths of individual states, the UN, regional organizations, and NGOs. The Oxford Handbook of Peacebuilding, Statebuilding, and Peace Formation Oliver P. Richmond, Gözüm Visoka, 2021 The Oxford Handbook of Peacebuilding, Statebuilding, and Peace Formation offers an authoritative and comprehensive overview of peacebuilding, statebuilding, and peace formation. With contributions from over thirty distinguished and leading scholars, the Handbook provides a timely, engaging, and critical overview of conceptual foundations, political implications, and tensions at the global, regional, and local levels. It examines the key policies, practices, examples, and discourses underlining various segments of peacebuilding, statebuilding, and peace formation both as discursive formulations and as policy practices. Organized around four major thematic sections, the Handbook offers a state-of-the-art synthesis of the most pressing contemporary peace and conflict issues and charts new pathways for responding to transnational insecurities--

Managing and Settling Ethnic Conflicts Ulrich Schneckener, 2004 Following a theoretical introduction, experts in ethnopolitics provide in-depth case studies, covering each of the major approaches to conflict management and settlement in different geographic regions.

World Development Report 2011 World Bank, 2011-05-01 The 2011 WDR on Conflict, Security and Development underlines the devastating impact of persistent conflict on a country or region's development prospects - noting that the 1.5 billion people living in conflict-affected areas are twice as likely to be in poverty. Its goal is to contribute concrete, practical suggestions on conflict and fragility.

Contemporary Peacemaking J. Darby, Roger Mac Ginty, 2008-06-11 Contemporary Peacemaking draws on recent experience to identify and explore the essential components of peace processes. The book is organized around five key themes in peacemaking: planning for peace; negotiations; violence on peace processes; peace accords; and peace accord implementation and post-war reconstruction.

African Conflicts and Informal Power Mats Utas, 2012-09-13 In the aftermath of an armed conflict in Africa, the international community both produces and demands from local partners a variety of blueprints for reconstructing state and

society. The aim is to re-formalize the state after what is viewed as a period of fragmentation. In reality, African economies and polities are very much informal in character, with informal actors, including so-called Big Men, often using their positions in the formal structure as a means to reach their own goals. Through a variety of in-depth case studies, including the DRC, Sierra Leone and Liberia, this comprehensive volume shows how important informal political and economic networks are in many of the continent's conflict areas. Moreover, it demonstrates that without a proper understanding of the impact of these networks, attempts to formalize African states, particularly those emerging from wars, will be in vain.

Nurturing Peace Fen Osler Hampson, 1996 Although the book explores the roles that other factors - such as regional and systemic power relationships, the terms of the settlement itself, and the role of ripeness - play in the success or failure of these peace settlements, it concludes that success hinges more on what third parties do and do not do.

Burundi on the Brink, 1993-95 Ahmedou Ould Abdallah, 2000 The volume concludes with an analysis of what Burundi tells us about what does and what doesn't work in the practical realm of preventive diplomacy.--BOOK JACKET.

International Conflict Resolution After the Cold War National Research Council, Commission on Behavioral and Social Sciences and Education, Committee on International Conflict Resolution, 2000-11-07 The end of the Cold War has changed the shape of organized violence in the world and the ways in which governments and others try to set its limits. Even the concept of international conflict is broadening to include ethnic conflicts and other kinds of violence within national borders that may affect international peace and security. What is not yet clear is whether or how these changes alter the way actors on the world scene should deal with conflict: Do the old methods still work? Are there new tools that could work better? How do old and new methods relate to each other? *International Conflict Resolution After the Cold War* critically examines evidence on the effectiveness of a dozen approaches to managing or resolving conflict in the world to develop insights for conflict resolution practitioners. It considers recent applications of familiar conflict management strategies, such as the use of threats of force, economic sanctions, and negotiation. It presents the first systematic assessments of the usefulness of some less familiar approaches to conflict resolution, including truth commissions, engineered electoral systems, autonomy arrangements, and regional organizations. It also opens up analysis of emerging issues, such as the dilemmas facing humanitarian organizations in complex emergencies. This book offers numerous practical insights and raises key questions for research on conflict resolution in a transforming world system.

Consociational Theory Rupert Taylor, 2009-03-20 Consociational power sharing is increasingly gaining ground, right around the world, as a means for resolving political conflict in divided societies. In this volume, edited by Rupert Taylor, nineteen internationally-respected scholars engage in a lively debate about the merits of the theory underlying this approach. The volume focuses specifically on one of the leading cases under the global spotlight, the Northern Ireland conflict, and brings together the most prominent proponents and opponents of consociationalism. Northern Ireland's transition from war

to peace is seen by consociationalists as flowing from the historic Belfast Agreement of 1998, and specifically from the Agreement's consociational framework. The Northern Ireland case is marketed by consociationalists as representing best practice, and as providing a template for ending conflicts in other parts of the world. However, as this volume interrogates, on what grounds, and to what extent, can such a positive reading be upheld? Taken as a whole, this volume, structured as a symposium around the highly-influential argument of John McGarry and Brendan O'Leary, offers comparative, engaging, and critical insight into how political theory can contribute to the creation of a better world. Consociational Theory is an important text for anyone with an interest in political theory, conflict resolution in divided societies, or Irish politics.
