**History Italian English Italian Practical Dictionary**...First Love that Never Fades
Anna could never forget her first love, Leo. Their paths had crossed when they were both 16, at a magical summer camp. They were inseparable, spending every day laughing, exchanging heartfelt thoughts, and experiencing the thrill of first love. Their bond was indestructible, and they vowed to maintain their bond, to wait for each other, and to love each other forever. But life, as it often does, had a different path in store for them. They lost communication, they moved on with their lives, and they eventually married other people. Years passed, and the turmoil of life took them in different directions. But fate, it seems, had not forgotten their unwavering connection. At a chance encounter, at a sentimental reunion, their paths crossed once again. The moment they laid eyes on each other, the flame of their first love rekindled. The same electric spark that had drawn them together years ago was still palpable. They felt the same thrill that had fueled their teenage romance, but they also felt the burden of their past. Their emotions swirled for the unconditional love they had shared, but their minds grappled with the challenges of their current lives. They were caught in a emotional battle, torn between the alluring memories of their first love and the stability and security of their present. They stood at a defining moment, forced to make a difficult choice. Would they choose the magnetic pull of their first love, risking the unpredictability that lay ahead, or would they hold onto the stability of their current lives, forever wondering what could have been? Only time would tell if their unwavering connection would find a way to prevail.

**Story of** Italian English English Italian Practical Dictionary

The symptoms of Osgood-Schlatter disease are swelling of knee, tenderness below knee area and limping. The doctor will check the medical history of the patient and will conduct physical examination and diagnostic procedures such as taking an X-ray. The physician will decide on the treatment to be done by studying the overall health, age, medical history, tolerance for certain medications and extent of the disease. Treatment will include medications, rest, compression, elevation, neoprene knee sleeve and physical therapy. The main aim will be to control and limit the knee pain by cutting down on the adolescent’s physical activities. Usually the Osgood-Schlatter disease gets healed over a period of time and in very rare cases is a surgery required.

Slipped capital femoral epiphysis is a problem which affects the hip joint. The ball or head of the thigh bone, also known as femoral head slips from the thigh bone’s neck. Because of this the hip joint becomes stiff and painful. Slipped capital femoral epiphysis is the most common disorder of the hip which can happen in both the hips or one and it is more common in boys when compared to girls. Basically, adolescents of the age ten to eighteen years and who are overweight can be affected by this condition. The condition can arise over a time interval of few weeks or years. The condition, if resulted because of trauma and is also called acute slip and if results after a period of time is called chronic slip. Slipped capital femoral epiphysis is caused because of medications, radiation treatment, thyroid problems, and chemotherapy. There are three degrees of intensity of slipped capital femoral epiphysis, mild, moderate and severe. In mild slipped capital femoral epiphysis, only one third of femoral head slips from the thigh bone. In moderate, one third to half slips and in severe, more than half of the femoral head slips. The symptoms of this condition are pain in hip which increases upon movement, pain in thigh, knee & groin and limpness in the leg. When an adolescent walks there will be a clicking sound in the hip and his/her legs will be turned outwards.

**The Best Italian English English Italian Practical Dictionary** It is best when the adolescent delays and abstains from sexual relationships, because the younger the person, the more susceptible he/she is to get a sexually transmitted disease. Having sexual contact during menstruation is also risky. It is good to avoid anal intercourse and if it is performed condom is a must, even when having oral sex. Every person should get STD checkups as frequently as possible, irrespective of being sexually active or not, after they turn into adolescents. Precaution must also be taken when getting injected by an intravenous drug, that the needle used to inject must be sterile. The adolescent must be educated about the symptoms and risks of sexually transmitted diseases.

Adolescents must be thoroughly informed even if they say they know it all. They must be asked to indulge in only safe sex, if doing so. Parents should talk honestly and calmly about safe sex and must answer all their child’s queries. Topics such as STDs, birth control methods, having sex because of peer pressure, and date rape must be discussed in detail. Most people think that kissing is safe, but it can spread the sexually transmitted disease, herpes and many other diseases. Condoms do not provide hundred percent protections for genital warts, AIDS and genital warts. Females shouldn’t douche as it can make the infection go deeper into the reproductive tract and can also wash off spermicidal protection. At a time, sexual intercourse must be provided with only one partner, who isn’t involved with any other sexual partner.

to travel to the country you're adopting from for court, and then usually ten days after court you get to bring your child home to meet their new family. Some people are dog people. **Benefits of a good after school program**

Children grow up in a society that demands expertise in everything. You really cannot sit back and decide that learning from textbooks is enough for the overall development of your child. Its the age of specialization and your child cannot afford to miss out on this window of opportunity. So, scour your locality for the most advantageous programs and enroll them for the ones you think are the best. After school programs are basically designed to develop a talent or a skill that is ignored by regular schools. These programs could be educational or recreational in nature. Whatever type they are, they basically aim to keep the child active and interested. The most important advantage of a good after school program is that it widens your child's area of interests. He or she is introduced to new things, sometimes interesting, sometimes challenging. Mastering a new art form or a new skill increases the child's self-esteem. It also allows you to introduce your child to new career options. A child attending a music class may decide that she likes it so much that she wants to make a career out of it in the long run.

Should your child go for the football practice 5 days a week? Are 3 days enough? It is common for parents to be a little confused when it comes to deciding how much is too much with reference to after school activities. They argue that since most of the activities are fun (as different from studies), children will simply lap up these classes. But, too much of fun can also make a child sick. Here is a simple guide that will help you decide how much is too much for your child. 

**Kindergarten:**
Your child is just beginning to learn to interact and get used to discipline. His or her after-school life should be simple and carefree. One or two classes per week are enough at the beginning. Once the child settles down, look for more challenging activities like a music program.

**Grade 1:**
One or two activities per week, play dates and playground visits are recommended. Avoid competitive sports activities. The child is still too young to have to worry about winning and losing. After the rigors of a full day at school, he or she needs a healthy outlet for pent up energy. Physical activities and noncompetitive sports are best for this age.

**Grade 2:**
Your child is old enough to voice opinions on what activities he or she wants. Sports, skating, swimming or computers - steer him towards things he likes. Many children begin lessons on a musical instrument around this age. But, allow your child some alone time during which he can unwind and just do whatever he wishes.
There are a lot of myths with regards to acupuncture. Some of these are true; others are silly while the rest only have a half truth. As you read on, you will learn which ones are worth believing.

The first myth is that acupuncture is painful. This is not true because those who have tried it claimed they only experienced a tiny prick while others did not feel anything at all. There is no tissue damage when the needle is inserted into the skin or pulled out and only in very rare cases are there traces of bruising.

The second myth is that you can get hepatitis or AIDS from acupuncture. This is true only if the needles used are not sterilized. In the US, this will never happen because acupuncturists are required to use disposable needles thus you are not at risk from these two diseases.

Obviously, school is top priority for children. They need to go to school, and finish their homework. They should then do their daily reading or writing work etc. This may take about 30-60 minutes. In the course of his daily work, your child may develop certain academic preferences and interests. In that case, you can try and find a program in a college or a community center that will help him and encourage him. In the age of the Internet, information is really not a rarity. Allow him to use the net to find more information about things that he likes. Encouraging the child to do independent research to gain in-depth knowledge is something that no formal program does.

If you are concerned about the lack of social life, enroll him or her in a club - a reading club maybe. Visit public libraries or even the theatre, if your child is interested. It is not necessary for your child to make friends with children his own age. A parent-child book club is another interesting option. If you can round up a number of like-minded children and their parents, you may well start your own after-school program.

When there is no organized group activity, look to your community. Many children love to get involved in social problems. They get their first real taste of suffering, charity and community help from such experiences. Volunteering for clean-up sessions, adult education programs etc could be a real eye-opener for your child. The lessons thus learnt are invaluable.

They can determine what created the profits as well as the losses. Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.
