But when Lauren, a Yale academic, deciphers the university's mysterious Voynich manuscript, which has

confounded experts for centuries, everything changes. An attempt to steal her translation of the Voynich leaves Lauren hovering on the brink of death, and Ross in the depths of despair. He seeks salvation in the ancient manuscript, which chronicles the discovery of a mythic, fabulous garden: an Eden so terrible and miraculous it rewrites the book of Genesis. The possibility of the garden's existence offers Ross the only hope of saving Lauren and their unborn child and so he decides to seek the garden out before it is too late. But he is not alone. Racing against time, a lethal assassin and a fanatical priest desperate to claim the miraculous garden for his church, Ross's quest will lead him to a place that will challenge everything he ever thought about the source of life on earth.

Gustav Mahler Donald Mitchell, 1980-01-01 Available again for a new generation of Mahlerians, Donald Mitchell's famous study of the composer's early life and music, revised and updated in 1980, includes a new introduction by the author, and supplementary addenda, which bring this classic work once again to the forefront of Mahler studies. Tracing Mahler's life from his birth in Bohemia, then part of the mighty Austro-Hungarian empire, to his early works (many now lost) *Gustav Mahler: The Early Years* forms an indispensable prelude to the period during which the cycle of great symphonies was to evolve. The conflicts which came to mark Mahler's music and personality had their beginnings in his childhood and youth. Without understanding the territorial, social and familial conflicts of this time one cannot truly appreciate the impulses behind the major symphonies and song cycles of his later years. Terror in France Gilles Kepel, 2017-05-09 The virulent new brand of Islamic extremism threatening the West In November 2015, ISIS terrorists massacred scores of people in Paris with coordinated attacks on the Bataclan concert hall,

cafés and restaurants, and the national sports stadium. On Bastille Day in 2016, an ISIS sympathizer drove a truck into crowds of vacationers at the beaches of Nice, and two weeks later an elderly French priest was murdered during morning Mass by two ISIS militants. Here is Gilles Kepel's explosive account of the radicalization of a segment of Muslim youth that led to those attacks—and of the failure of governments in France and across Europe to address it. It is a book everyone in the West must read. Terror in France shows how these atrocities represent a paroxysm of violence that has long been building. The turning point was in 2005, when the worst riots in modern French history erupted in the poor, largely Muslim suburbs of Paris after the accidental deaths of two boys who had been running from the police. The unrest—or French intifada—crystallized a new consciousness among young French Muslims. Some have fallen prey to the allure of war of civilizations rhetoric in ways never imagined by their parents and grandparents. This is the highly anticipated English edition of Kepel's sensational French bestseller, first published shortly after the Paris attacks. Now fully updated to reflect the latest developments and featuring a new introduction by the author, Terror in France reveals the truth about a virulent new wave of jihadism that has Europe as its main target. Its aim is to divide European societies from within by instilling fear, provoking backlash, and achieving the ISIS dream—shared by Europe's Far Right—of separating Europe's growing Muslim minority community from the rest of its citizens.

Italians and Food Roberta Sassatelli, 2020-08-14 This book is a novel and original collection of essays on Italians and

food. Food culture is central both to the way Italians perceive their national identity and to the consolidation of Italianicity in global context. More broadly, being so heavily symbolically charged, Italian foodways are an excellent vantage point from which to explore consumption and identity in the context of the commodity chain, and the global/local dialectic. The contributions from distinguished experts cover a range of topics including food and consumer practices in Italy, cultural intermediators and foodstuff narratives, traditions of production and regional variation in Italian foodways, and representation of Italianicity through food in old and new media. Although rooted in sociology, *Italians and Food* draws on literature from history, anthropology, semiotics and media studies, and will be of great interest to students and scholars of food studies, consumer culture, cultural sociology, and contemporary Italian studies.

Aron Demetz Alessandro Romanini, Günther Oberhollenzer, 2019-02-05 Contemporary sculptor Aron Demetz uses traditional techniques to create electrifying pieces in conversation with works of antiquity. Working primarily in wood, and specifically with basswood, cedarwood, and sequoia, Aron Demetz uses this traditional material to highlight man's relationship to nature. This volume compares Demetz's works with classical sculpture, opening a fascinating dialogue between modern and ancient forms and techniques. Hailing from Northern Italy, Demetz employs regional 17th-century woodcarving techniques in his figurative works. He updates those techniques by layering his sculptures with foils or resin or by charring the artworks which powerfully alter the original wood in ways that are both haunting and familiar. This volume, complete with beautiful reproductions and scholarly essays, offers an in-depth look into Demetz's oeuvre.

Alexander Girard Mateo Kries, Jochen Eisenbrand, 2016 When spontaneous student protests erupted in Hong Kong on 28 September 2014 as a reaction to proposed changes in the electoral process, the global media was rife with images not only of the protesters themselves, but also the myriad informal structures and designs they had created. Barricades, shelter and sculptures were constructed from everyday objects, the umbrellas that coined the movement's name were used for protection from police enforcement. The exhibition presents this act of civil disobedience through the objects that were spawned by the movement, illustrating that design not only shapes and defines products, but can function as an agent of change in politics, communication and social innovation. 00Exhibition: Vitra Design Museum, Weil, Germany (12.03.2016-29.01.2017)

Electromagnetic Fields Alan M. Portis, 1978 Here is a textbook that develops the classical theory of electromagnetic fields from a contemporary point of view-with applications to the physics of condensed matter and plasmas. It more thoroughly relates electricity and magnetism to media, integrating solid state physics, plasma physics, and optics into the electromagnetic fields course. Portis's balance of theory and application, along with his effective use of relativity, has produced a text that is constructive as well as complete. He emphasizes the experimental investigations of Coulomb and Faraday together with the special theory of relativity, including applications at each stage of development to topics in the physics of condensed matter and plasmas. Each section is followed by exercises that are designed to reinforce the topics discussed. Chapter problems emphasize the connection with the present material to previous chapters. Besides his balance of theory and application, reviewers have also praised Portis for the logical organization, consistency in notation and presentation, and the inclusion of condensed matter to topics. Ideal for those with a background in mathematics and general physics, Electromagnetic Fields can be used in courses that also recognize solid state physics, optics, plasma physics, and modern physics.- Publisher
