Peter Sahlins

A Cinema of Loneliness Robert Phillip Kolker,2000 In this 20th anniversary edition, Kolker continues and expands his inquiry into the phenomenon of cinematic representation of culture by updating and revising the chapters on Kubrick, Scorsese, Altman and Spielberg.

The British Cabinet John Pitcairn Mackintosh,1968

Party Identification and Beyond Ian Budge,Ivor Crewe,Dennis J Farlie,2024-10-31 First published in 1976, this classic volume of original essays provides a unique and comprehensive review of the approaches and assumptions that dominate the field of election studies and voting behaviour. Critical reviews of theory and established research are combined with innovative and original studies of a variety of European countries, as well as North America. The volume presents valuable comparative data and methodological insights, including statistical analyses of voting data and critical accounts of major approaches to the representation of voting and party competition. These include party identification (the socio-psychological approach); dimensional analysis (the production of party spaces based on social and political cleavages); and rational choice analysis (the interaction between voters and parties within a policy space). This edition includes a new introduction by Ian Budge.

The Organization of Governments Jean Blondel,1982

Political Leadership Jean Blondel,1987 Political leaders are the most universal, recognized, and talked about element of political life. However, the general analysis of political leadership has been little advanced. In this book Professor Blondel provides a general framework for the systematic study of leadership to make possible future empirical study and comparative analysis of political leadership. After examining the current state of political leadership studies, Professor Blondel categorizes the leaders of the world taking into account both their goals and the constraints and opportunities resulting from the environment. Important features and influences on leadership are identified: the sources of personal power, the role of leaders' own psychology and perspective, the instruments of power available to leaders, their relationship with subordinates and citizens, the influence of institutions on leadership and the impact of leaders--Provided by publisher.

France, Germany, and the New Europe, 1945-1967 Frank Roy Willis, 1968

Eurasia Carl Grundy-Warr, 2002-09-11 Eurasia offers a wide-ranging and original interpretation of territory, boundaries and borderlands in Europe, Asia and the Far East. This forms part of a unique series of books focussing on world boundaries which embrace the theory and practice of boundary delimitation and management, boundary disputes and conflict resolution, and territorial change in the new world order.

Boundaries Peter Sahlins, 2023-04-28 This book is an account of two dimension of state and nation building in France and Spain since the seventeenth century--the invention of a national boundary line and the making of Frenchmen and Spaniards. It is also a history of Catalan rural society in the Cerdanya, a valley in the eastern Pyrenees divided between Spain and France in 1659. This study shuttles between two levels, between the center and the periphery. It connects the macroscopic political and diplomatic history of France and Spain, from the Old Regime monarchies to the national territorial states of the later nineteenth century; and the molecular history--the historical ethnography--of Catalan village communities, rural nobles, and peasants in the borderland. On the frontier, these two histories come together, and they can be told as one. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1990. This book is an account of two dimension of state and nation building in France and Spain since the seventeenth century--the invention of a national boundary line and the making of Frenchmen and Spaniards. The Oder-Neisse Line Debra J. Allen, 2003-07-30 When the United States and its World War II allies met at the Potsdam Conference to provisionally establish the Oder-Neisse line as Poland's western border and to acknowledge the removal of Germans from the area, they created a controversial Cold War issue that would not be resolved until 1990. American policy makers throughout those decades studied and analyzed materials and reports to determine whether the border should be adjusted or recognized to promote the well being of Europe and the United States. This is the first study to cover the full history of the Oder-Niesse line and its impact on U.S. relations with Poland and the Federal Republic of Germany, as well as its domestic implications, throughout the Cold War years. As with many diplomatic questions, the State Department did not have the luxury of addressing this issue in a vacuum. Instead, the foreign policy bureaucracy had to keep its focus on the border issue while scrutinizing Soviet words and actions regarding its satellites in East Germany and Poland, and to address members of Congress and the public (including various groups of Polish Americans) who wanted specific, but often differing, actions taken in respect to the border. This work reveals how the diplomats and policy makers handled such internal conflict,

the sometimes skewed perceptions of America held by Europeans, and how the State Department interacted with the public.

Frontiers and Boundaries in U.S. History Cornelis A. van Minnen, Sylvia L. Hilton, 2004 The essays collected in this volume explore the frontier theme in American history, not only as it relates to issues of political jurisdiction, territorial expansion, and cultural interaction, but also as a concept which is applicable to any different types of historically significant boundaries that have been used to differentiate and separate, that have been renegotiated, or that might be historiographically redefined. Physical geography, demographic movements, international relations, political culture, social customs, language, religion, and other cultural factors, as they intertwined over time, have all played roles in the historical processes of defining the nation, its values and the limits of its power. The same factors have also given rise to different social groups, interests and jurisdictions within the nation. These essays examine many kinds of frontiers and boundaries -- territorial, economic, ethnic, literary, artistic, ideological, political, institutional, administrative, and even historiographical -- discussing theoretical and interpretative problems in their demarcation, as well as their transgression, and their relationship with the exercise of power, from colonial times to the present.

Medieval Frontiers: Concepts and Practices David Abulafia, Nora Berend, 2017-03-02 In recent years, the 'medieval frontier' has been the subject of extensive research. But the term has been understood in many different ways: political boundaries; fuzzy lines across which trade, religions and ideas cross; attitudes to other peoples and their customs. This book draws attention to the differences between the medieval and modern understanding of frontiers, questioning the traditional use of the concepts of 'frontier' and 'frontier society'. It contributes to the understanding of physical boundaries as well as metaphorical and ideological frontiers, thus providing a background to present-day issues of political and cultural delimitation. In a major introduction, David Abulafia analyses these various ambiguous meanings of the term 'frontier', in political, cultural and religious settings. The articles that follow span Europe from the Baltic to Iberia, from the Canary Islands to central Europe, Byzantium and the Crusader states. The authors ask what was perceived as a frontier during the Middle Ages? What was not seen as a frontier, despite the usage in modern scholarship? The articles focus on a number of themes to elucidate these two main questions. One is medieval ideology. This includes the analysis of medieval formulations of what frontiers should be and how rulers had a duty to defend and/or extend the frontiers; how frontiers were defined (often in a different way in rhetorical-ideological formulations than in practice); and how in certain areas frontier ideologies were created. The other main topic is the emergence of frontiers, how medieval people created frontiers to delimit areas, how they understood and described frontiers. The third theme is that of encounters, and a questioning of medieval attitudes to such encounters. To what extent did medieval observers see a frontier between themselves and other groups, and how does real interaction compare with ideological or narrative formulations of such interaction?

Maps and Politics Jeremy Black, 2000-12 Do maps accurately and objectively present the information we expect them to

portray, or are they instead colored by the political purposes of their makers? In this lively and well-illustrated book, Jeremy Black investigates this dangerous territory, arguing persuasively that the supposed objectivity of the map-making and map-using process cannot be divorced from aspects of the politics of representation.

Centre-periphery Structures in Europe Stein Rokkan, 1987

National Identity and Geopolitical Visions Gertjan Dijink, 2002-11-01 From the Third Reich to Bosnia, nationalism - a sense of a nation's place in the world - has been responsible for much bloodshed. Nationalism may be manipulated by political leaders or governments but it springs from the people. Something in the history and environment of a national group creates it. This volume aims to locate and analyze the myth of national identity and its value in creating pride, deflecting fear or legitimating aggression. A range of essays - on Britain, the United States, Germany, Russia, Iraq, Serbia, Argentina, Australia, and India - illustrate the different manifestations of the geographical imagination across the countries of the world.

Unlocking the Cabinet Thomas T Mackie, Brian W Hogwood, 1985 Comparative studies of politics have neglected the cabinet and cabinet committees which are at the centre of the decision-making process in Western parliamentary democracies. *Unlocking the Cabinet* provides the first comparative analysis of cabinet structures in parliamentary systems, revealing the powerful role of cabinet committees. Part One outlines a framework for comparing decision arenas in political executives. Part Two uses the comparative framework, and analyses the history, structures and changing roles of cabinet committees in the United Kingdom, Canada, Australia, New Zealand, Denmark, the Netherlands and Switzerland.

Nationalising and Denationalising European Border Regions, 1800-2000 Hans Knippenberg, J. Markuse, 2012-12-06 During the last two centuries, the political map of Europe has changed considerably. More recently, there are remarkably contrasting tendencies concerning the functions and densities of borders. The borders inside the European Union lost their importance, whereas Central and Eastern Europe saw the birth of a multitude of new state borders. The long-term study of border regions, therefore, is a fascinating subject for geographers, historians, social scientists, and political scientists. The main thesis of this book is that the rise of the modern nation-state reinforced the separating function of state borders by nationalising the people on both sides of it. This process gained strength in the late 19th and early 20th centuries, and was challenged in the second half of this century by processes of supra-national integration, globalisation and the revolution in communication and transport, as the case studies from different parts of Europe of this book will show. Audience: This book will be of interest to academics, researchers and practitioners in geography, history, political sciences, European studies and East-European studies.

Living (with) Borders Ulrike Hanna Meinhof, 2018-02-05 This title was first published in 2002. Most nation states in Europe have undergone dramatic social and political upheaval with the construction of new or the redefinition of existing national borders. This book uses discourse analytical methods to focus on and unravel the complex cultural identities of

people living in communities that straddle the border stretching from the Adriatic to the Baltic Sea.
