Educational Psychology John W. Santrock,2021 Each chapter opens with a high-interest teaching story that is linked to the chapter's content. Many of these stories were written especially for this text by outstanding teachers. A feature formerly titled Connecting with Teachers: Best Practices that appears numerous times in each chapter is now titled Connecting with Students: Best Practices. I am especially indebted to many outstanding teachers for the examples they provided for the Connecting with Students material that connects theory and practice. Another feature, Through the Eyes of Teachers, is embedded in Connecting with Students: Best Practices, presenting the strategies that leading teachers-many of them award-winning-use related to the topic(s) that have just been discussed. Prospective teachers who take a course in developmental psychology will be teaching at different grade levels. They want to better understand developmental changes in students and the best way to teach students at the grade level at which they will teach. I asked a number of outstanding teachers at four different levels of schooling (early childhood, elementary school, middle school, and high school) to provide their recommendations of the best teaching practices related to the topic being discussed at that point in the text. Their comments appear multiple times within chapters--

Adolescence John W. Santrock,2007 More students learn from John Santrock's *Adolescence* than from any other text in this field. Students and instructors rely on the careful balance of accurate, current research and applications to the real lives of adolescents. The fully-revised eleventh edition includes a new chapter on health, expanded coverage of late adolescence,

and more than 1200 research citations from the 21st century.

Developmental and Educational Psychology for Teachers Dennis McInerney, David Putwain, 2016-09-13 Developmental and Educational Psychology for Teachers brings together a range of evidence drawn from psychology to answer a number of critical educational questions, from basic questions of readiness – for example, when is a child ready for school, through to more complex matters, such as how does a teacher understand and promote good peer relationships in their classroom? The answers to these and other questions discussed draw here on the interplay between a teachers' craft expertise and their knowledge of evidence and theory from developmental and educational psychology. Presenting a range of classic theories and contemporary research to help readers understand what the key issues are for teachers and other professionals, this book aides informed educational decisions in situations such as: inclusion, ability grouping, sex differences, developing creativity, home and peer influences on learning, and developing effective learners. Teachers in early years, primary and secondary settings are routinely faced with questions regarding the development of children. This not only relates to the planning and delivery of lessons, but also to the mental and physical wellbeing of the children and adolescents that they teach. The pedagogical features of this book are accessible and clearly presented, including focus questions that direct the reader's attention to key issues, activity posts that point the reader to meaningful and relevant research and show the practical applications of material covered, and extension material that gives depth to many of the topics covered. This book aims to inform the practice of both in-service and trainee teachers, addressing issues that are relevant to their practice. With no other detailed and accessible text presenting this evidence and theory specifically for an audience of practicing and trainee teachers currently on the market, this book will be of essential reading to practicing and trainee teachers for early years, primary and secondary education and other related educational contexts such as educational psychologists, counsellors, paediatric and child doctors and nurses.
