Strategic Sports Event Management Guy Masterman, 2014-05-16 The hosting of sports events – whether large international events, or smaller niche events – can have a significant and long-lasting impact on the local environment, economy and society. Strategic Sports Event Management provides students and event managers with an insight into the strategic management of sports events of all scales and types, from international mega-events to school sports. Combining a unique conceptual framework with a practical, step-by-step guide to planning, organising, managing and evaluating events, the book explains the importance of adopting a strategic approach, showing how to implement strategies that lead to successful outcomes over the short and long-term. This fully revised and updated third edition uses international case studies in every chapter, from the NBA and NFL to Formula One and the English Premier League, offering real-world insight into both larger and smaller events. In addition, woven throughout the book are a series of in-depth studies of the London Olympic Games, the ultimate sporting event and an important point of reference for all practising and aspiring event managers. The book covers every key aspect of the sports event management process, including sports organizations, such as the IOC, FIFA and IAAF, and their interactions with event partners, the media and promoters short-term and long-term benefits of the planning process event impact and legacy operational functions including finance, ticketing, transport, venues, IT, human resources, and security marketing and communications, including social networking and new media the bidding process research and evaluation. Strategic Sports Event Management is the leading sports event management textbook and is now accompanied by a companion website containing a range of additional teaching and learning features. The book is important reading for all students of sport management or event management, and all practising event managers looking to develop their professional skills..

Proceedings of the International Conference on Advanced Intelligent Systems and Informatics 2016 Aboul Ella Hassanien, Khaled Shaalan, Tarek Gaber, Ahmad Taher Azar, M. F. Tolba, 2016-10-20 This book gathers the proceedings of the 2nd International Conference on Advanced Intelligent Systems and Informatics (AISI2016), which took place in Cairo, Egypt during October 24-26, 2016. This international interdisciplinary conference, which highlighted essential research and developments in the field of informatics and intelligent systems, was organized by the Scientific Research Group in Egypt (SRGE) and sponsored by the IEEE Computational Intelligence Society (Egypt chapter) and the IEEE Robotics and

Automation Society (Egypt Chapter). The book's content is divided into four main sections: Intelligent Language Processing, Intelligent Systems, Intelligent Robotics Systems, and Informatics.

New Orleans Sports Thomas Aiello, 2019-08-01 New Orleans has long been a city fixated on its own history and culture. Founded in 1718 by the French, transferred to the Spanish in the 1763 Treaty of Paris, and sold to the United States in 1803, the city's culture, law, architecture, food, music, and language share the influence of all three countries. This cultural mélange also manifests in the city's approach to sport, where each game is steeped in the city's history. Tracing that history from the early nineteenth century to the present, while also surveying the state of the city's sports historiography, New Orleans Sports places sport in the context of race relations, politics, and civic and business development to expand that historiography—currently dominated by a text that stops at 1900—into the twentieth century, offering a modern examination of sports in the city.

ICCWS 2016 11th International Conference on Cyber Warfare and Security Dr Tanya Zlateva and Professor Virginia Greiman, 2016 The 11th International Conference on Cyber Warfare and Security (ICCWS 2016) is being held at Boston University, Boston, USA on the 17-18th March 2016. The Conference Chair is Dr Tanya Zlateva and the Programme Chair is Professor Virginia Greiman, both from Boston University. ICCWS is a recognised Cyber Security event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual and empirical advances in the area of Cyber Warfare and Cyber Security. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of Cyberwar and Cyber Security research available to them. The keynote speakers for the conference are Daryl Haegley from the Department of Defense (DoD), who will address the topic Control Systems Networks...What's in Your Building? and Neal Ziring from the National Security Agency who will be providing some insight to

the issue of Is Security Achievable? A Practical Perspective. ICCWS received 125 abstract submissions this year. After the double blind, peer review process there are 43 Academic Research Papers 8 PhD papers Research papers, 7 Masters and 1 work-in-progress papers published in these Conference Proceedings. These papers represent work from around the world, including: Australia, Canada, China, Czech Republic, District of Columbia, Finland, France, Israel, Japan, Lebanon, Netherlands, Pakistan, Russian Federation, Saudi Arabia, South Africa, Turkey, United Arab Emirates, UK, USA.

Fossil Record 6 Volume 1 Spencer G. Lucas,Robert M. Sullivan,

Research Methods in Human-Computer Interaction Jonathan Lazar,Jinjuan Heidi Feng,Harry Hochheiser,2017-04-28 Research Methods in Human-Computer Interaction is a comprehensive guide to performing research and is essential reading for both quantitative and qualitative methods. Since the first edition was published in 2009, the book has been adopted for use at leading universities around the world, including Harvard University, Carnegie-Mellon University, the University of Washington, the University of Toronto, HiOA (Norway), KTH (Sweden), Tel Aviv University (Israel), and many others. Chapters cover a broad range of topics relevant to the collection and analysis of HCI data, going beyond experimental design and surveys, to cover ethnography, diaries, physiological measurements, case studies, crowdsourcing, and other essential elements in the well-informed HCI researcher's toolkit. Continual technological evolution has led to an explosion of new techniques and a need for this updated 2nd edition, to reflect the most recent research in the field and newer trends in research methodology. This Research Methods in HCI revision contains updates throughout, including more detail on statistical tests, coding qualitative data, and data collection via mobile devices and sensors. Other new material covers performing research with children, older adults, and people with cognitive impairments. - Comprehensive and updated guide to the latest research methodologies and approaches, and now available in EPUB3 format (choose any of the ePub or Mobi formats after purchase of the eBook) - Expanded discussions of online datasets, crowdsourcing, statistical tests, coding qualitative data, laws and regulations relating to the use of human participants, and data collection via mobile devices and sensors - New material on performing research with children, older adults, and people with cognitive impairments, two new case studies from Google and Yahoo!, and techniques for expanding the influence of your research to reach non-researcher audiences, including software developers and policymakers

World of Sport Matthew Taylor,2024-12-10 World of Sport examines the development of modern sport from the mid-nineteenth century to the 1960s in the light of transnational approaches to history. Critically probing existing studies and offering new insights, this volume demonstrates that while sport was a national and international phenomenon, it was invariably constructed transnationally. Taking in topics ranging from the dissemination of football codes to transpacific surfing cultures, and the touring lives of baseball and hockey players to the contact zones of international competition, it emphasises the importance of transnational perspectives in the way people around the globe experience sport. Like other forms of popular culture, sport cannot be properly understood without reference to the cross-national connections that helped to disseminate rules and regulations, circulated styles of play and performance, and drove forward regional and international competition. Drawing on case studies that range time periods and continents, World of Sport is a must-read for students and researchers interested in the place of sport in the interconnected modern world and the transnational origins of the global sporting order in the twenty-first century.

Applying Computational Intelligence for Social Good ,2024-01-14 Applying Computational Intelligence for Social Good: Track, Understand and Build a Better World, Volume 132 presents views on how Computational Intelligent and ICT technologies can be applied to ease or solve social problems by sharing examples of research results from studies of social anxiety, environmental issues, mobility of the disabled, and problems in social safety. Sample chapters in this release include Why is implementing Computational Intelligence for social good so challenging? Principles and its Application, Smart crisis management system for road accidents using Geo-Spatial Machine Learning Techniques, Residential Energy Management System (REMS) Using Machine Learning, Text-Based Personality Prediction using XLNet, and much more. - Explores a number of key themes, including self-organization, complex adaptive systems, and emergent computation for solving socially relevant problems - Focuses on Forecasting applications, Human Behavior and Critics response analysis in social forums, Healthcare monitoring Systems, Disaster Management, Industrial management, and most recently, Epidemics and Outbreaks - Brings together many different aspects of the current research on intelligence technologies, such as neural networks, support vector machines, fuzzy logic, and evolutionary computation

Deep Learning for Marine Science, volume II Haiyong Zheng,Jie Nie,Xiangrong Zhang,Huiyu Zhou ,An-An Liu,2024-11-07 This Research Topic is the second volume of this collection. You can find the original collection via <https://www.frontiersin.org/research-topics/45485/deep-learning-for-marine-science> Deep learning (DL) is a critical research branch in the fields of artificial intelligence and machine learning, encompassing various technologies such as convolutional neural networks (CNNs), recurrent neural networks (RNNs), Transformer networks and Diffusion models, as well as self-supervised learning (SSL) and reinforcement learning (RL). These technologies have been successfully applied to scientific research and numerous aspects of daily life. With the continuous advancements in oceanographic observation equipment and

technology, there has been an explosive growth of ocean data, propelling marine science into the era of big data. As effective tools for processing and analyzing large-scale ocean data, DL techniques have great potential and broad application prospects in marine science. Applying DL to intelligent analysis and exploration of research data in marine science can provide crucial support for various domains, including meteorology and climate, environment and ecology, biology, energy, as well as physical and chemical interactions. Despite the significant progress in DL, its application to the aforementioned marine science domains is still in its early stages, necessitating the full utilization and continuous exploration of representative applications and best practices.

In search of sustainable and inclusive palm oil production Idsert Jelsma, 2019-08-30 In search of sustainable and inclusive palm oil production builds on the old debate regarding the role of smallholder farmers in society and links it to the integration of smallholders into modern global value chains. Since the peak in global agro-commodity prices in 2007/08, interest in agriculture has increased again among policymakers and in the private sector. Modern global value chains provide opportunities for smallholder farmers but also increasingly dictate conditions in terms of production practices, and thereby determine conditions for inclusion. The Indonesian oil palm sector provides an interesting case regarding smallholder inclusion in modern global value chains and the role they play in sustainable agro-commodity production. Palm oil production in Indonesia has thrived due to insertion in global value chains, experienced massive smallholder engagement, faces considerable sustainability challenges and illustrates the impacts sustainability initiatives can have on smallholders. It thus provides a promising case to further explore the nexus of sustainable and inclusive development, smallholder agriculture and policy. The primary aim of this book is to advance the understanding of how the oil palm sector can be made more sustainable and inclusive. It does so by exploring independent and organized oil palm smallholders in Sumatra, explaining their emergence and performance, and discussing strategies to improve their performance. Whereas the smallholder oil palm sector clearly has its unique characteristics, this book unpicks some stereotypical views on smallholders and highlights the dynamics impacting farmers' organizations over time, and thereby contributes to debates on the future of farming.

Web Engineering Tommi Mikkonen, Ralf Klamma, Juan Hernández, 2018-05-24 This book constitutes the refereed proceedings of the 18th International Conference on Web Engineering, ICWE 2018, held in Cáceres, Spain, in June 2018. The 18 full research papers and 17 short papers presented together with 2 practice papers, 6 demonstration papers, and 5 tutorials were carefully reviewed and selected from 103 submissions. The papers cover research areas such as Web application modeling and engineering; Web infrastructures and architectures; execution models; human computation and crowdsourcing applications; Web application composition and mashups; Social Web applications; Semantic Web applications; Web of Things applications; big data and data analytics; and security, privacy, and identity.
